

Robert M Stern is Professor of Economics and Public Policy (Emeritus) in the Department of Economics and Gerald R Ford School of Public Policy at the University of Michigan, Ann Arbor. He received his PhD in economics from Columbia University in 1958. He was a Fulbright scholar in the Netherlands in 1958–1959, taught at Columbia University for two years, and joined the faculty at the University of Michigan in 1961. He has been an active contributor to international economic research and policy for more than four decades. He has published numerous papers, books, and edited volumes on a wide variety of topics, including international commodity problems, the determinants of comparative advantage, price behavior in international trade, balance-of-payments policies, the computer modeling of international trade and trade policies, trade and labor standards, services liberalization, US-Japan international economic relations, and issues of multilateral and preferential trade liberalization. He has been a consultant to and done research under the auspices of many U.S. Government agencies and international organizations.

Professor Stern has collaborated with Alan Deardorff (University of Michigan) since the early 1970s and with Drusilla Brown (Tufts University) since the mid-1980s in developing the Michigan Model of World Production and Trade. This is a computer-based model that has been used to study a variety of important policy issues such as the effects of the GATT/WTO multilateral trade negotiations, changes in the structure of protection, trade and employment, changes in military expenditures, and the effects of preferential trading arrangements. He is currently working with Drusilla Brown and Kozo Kiyota (Yokohama National University) on the computational modeling and analysis of preferential and multilateral trade negotiations, and issues relating to the scope of the WTO and concepts of fairness in the global trading system and the conduct of the Doha Round negotiations with Andrew Brown. His recent papers can be accessed on the *Research Seminar in International Economics (RSIE)* website at the University of Michigan.
