

**Rifat A Atun** (MBBS MBA DIC FFPHM FRCGP) is Professor of International Health Management and Director of the Centre for Health Management at Tanaka Business School, Imperial College London, where he leads a multidisciplinary group of researchers. His research focuses on analysis of how contextual and health systems factors influence the implementation of complex health innovations, new health technologies and technology-enabled healthcare services. He works closely with the World Health Organization, the World Bank and governments in a number of countries in Europe, Central Asia, Latin America and the Middle East to design, implement and evaluate health systems development programmes. Professor Atun chairs the WHO Task Force on Health Systems and Tuberculosis Control. He is a director of Molecular Vision Ltd, an Imperial College spinout company operating in the medical diagnostics, founding director of Visbion Ltd, a health information and imaging solutions company and Medixine Oy, a Finnish company which offers multimodal information and communication software for healthcare and wellness.
