

Desmond Sheridan (MD, PhD, FRCP) is Professor of Cardiology at Imperial College London and the Royal Brompton and St. Mary's Hospitals, London. He qualified in Medicine at Trinity College Dublin, where he undertook his initial training and obtained his MD. He combined his clinical and research development at Leeds, St Louis and Newcastle upon Tyne, where he obtained his PhD. He was appointed Senior Lecturer and Consultant Cardiologist at the University Hospital of Wales in 1981 and to the Chair of Cardiology at St. Mary's Medical School, London in 1985 and Imperial College in 1988. He was clinical Dean of Imperial College School of Medicine from 1998-2001 and was appointed Principal Cardiovascular Advisor, Pfizer Global Research and Development from 2002–2005. Professor Sheridan is a practicing clinician; he teaches clinical medicine, supervises the scientific training medical and science graduates and undertakes research to investigate the mechanisms of cardiovascular disease. His publications relate to the understanding of disturbances in the heart rhythm and the mechanisms and consequences of normal and abnormal growth of heart muscle.
