

Prof Rowland Kao presently holds the position of Wellcome Trust Senior Research Fellow and Professor of Mathematical Population Biology at the University of Glasgow in the UK. He has previously held positions in New Zealand's Agricultural Pastoral Research Institute, the Institute for Animal Health, and held a Wellcome fellowship at the University of Oxford. He is currently Director of the Boyd Orr Centre for Population and Ecosystem Health at the University of Glasgow, and a member of the scientific management board of the Scottish Centre of Expertise in Animal Disease Outbreaks. His current research interests lie in the use of integrated tools to understand and control infectious diseases, and he has recently developed an interest in the integration of epidemiology with Health Economics. He is married to Fiona and has two children, Ellen and Rosie.
