everyone interested in China's Economy

Interpreting China's Economy 中国经济随笔

by **Gregory C Chow** 邹至庄 (Princeton University 普林斯顿大学)

Contents

- Part 1. Economic Development
- Part 2. Economic Analysis
- Part 3. Economic Policies
- Part 4. The American Economy by Comparison

This book is unique in covering all important topics of the Chinese Economy in depth but written in a language understandable to the layman and yet challenging to the expert. Beginning with entrepreneurship that propels the dynamic economic changes in China today, the book is organized into four broad parts to discuss China's economic development, to analyze significant economic issues, to recommend economic policies and to comment on the timely economic issues in the American economy for comparison.

Unlike a textbook, the discussion is original and thought-provoking. It is written by a most distinguished economist who has studied the Chinese economy for thirty years, after making breathtaking contributions to the fields of econometrics, applied economics and dynamic economics and serving as a major adviser to the government of Taiwan during its period of rapid development in the 1960s and 1970s. In the last thirty years, the author has served as a major adviser to the government of China on economic reform and important economic policies and cooperated with the Ministry of Education to introduce and promote the development of modern economics in China, including training hundreds of economists in China and placing many graduate students to pursue a doctoral degrees in economics in leading universities in the US and Canada. These graduates now plays pivotal roles in China and in the US in academics, business or government institutions. The essays, a culmination of the author's expertise in China over five decades, are being widely read in China. When the author became professor emeritus at Princeton, the University named the Econometric Research Program as the Gregory C. Chow Econometric Research Program in his honor.

JUDGE BAO AND THE RULE OF LAW

Eight Ballad-Stories from the Period 1250–1450

by **Wilt L Idema** (Harvard University, USA)

Pure, orthodox and incorruptible, Judge Bao has been serving as the preeminent embodiment of justice in China for almost a thousand years, so much so his court cases have been adapted as stories, novels and plays over the centuries. Now, for the very first time a series of eight ballad-stories on Judge Bao, dating from the period 1250–1450, are offered in a complete and annotated translation. These texts will provide the reader a reflection of the legend of Judge Bao in its earliest phase of development, with an extended introduction placing the ballad-stories in context with the development of the Judge

Bao legend. These ballad-stories, in contrast to past plays dating from the same period, present abuse of power and corruption as endemic in the courts and bureaucratic service, and show Judge Bao imposing the rule of law even on the emperor.

DIVIDED CHINA

Preparing for Reunification 883–947

by **Wang Gungwu** (East Asian Institute, National University of Singapore)

This is a revised edition of a study undertaken to explain what happened during one of the worst periods of division in Chinese history. What were the key factors that helped the centripetal forces to get back to the imperial norm? It begins with the final stage of decline of the Tang dynasty (618–907) and ends 50 years later when it became clear that the foundations for a last push towards unification were in place.

POLITICAL BOOMS

Local Money and Power in Taiwan, East China, Thailand, and the Philippines

by **Lynn T White** (Princeton University, USA)

“Professor White is one of the leading scholars on China and the rest of Asia. Here, his interests in China are on the local, particularly in southern Jiangsu and Zhejiang, and he gives special emphasis to the role of political networks at the local level. Importantly, however, he brings his thesis to bear on Taiwan, Thailand and the Philippines. I cannot think of any existing work with a similar range and analytical perspective.”

Dali Yang
 University of Chicago, USA

This book, unlike most previous studies, shows that both the roots and results of growth are largely political rather than economic. Specifically, it pays attention to local, not just national, power networks that caused or prevented growth in the four places under consideration. Violence has been common in these polities, along with money. Elections have contributed to socio-political problems that are also obvious in Leninist or junta regimes, because elections are surprisingly easy to buy with corrupt money from government contracts. Liberals should pay more serious theoretical attention to the effects of money on justice, and Western political science should focus more clearly on the ways non-state local power affects

elections. By considering the effects on fair justice of local money and power (largely from small- and medium-sized firms that emerge after agrarian reforms), this book asks democrats to face squarely the extent to which electoral procedures fail to help ordinary citizens. Students and scholars of Asia will all need this book — as will students of the West whose methods have become parochial.

NOBLE LECTURES IN ECONOMICS

World Scientific works closely with the Nobel Foundation in Stockholm to **publish** the **complete series of Nobel lectures** from **1901 onwards** including Nobel lectures in **Economic Sciences**. These volumes are collections of the Nobel Lectures delivered by the prizewinners, together with their biographies and the presentation speeches at the award ceremonies in Stockholm for the period 1969 – 2005. Each Nobel Lecture is based on the work for which the laureate was awarded the prize. This volume of inspiring lectures should be on the bookshelf of every keen student, teacher and professor of economics as well as of those in related fields.

■ NOBEL LECTURES IN ECONOMIC SCIENCES 2001 – 2005

edited by **Peter Englund** (*Stockholm School of Economics, Sweden*)
