

Kurt Wüthrich shares his time between the positions of Visiting Scientist at TSRI and Professor of Biophysics at the Eidgenössische Technische Hochschule Zürich (ETHZ), Switzerland. He is also Deputy Director and a Principal Investigator in the Zürich-based National Center of Competence in Research Structural Biology (NCCR Structural Biology). His research interests are in molecular structural biology, protein science and structural genomics. His specialty is nuclear magnetic resonance (NMR) spectroscopy with biological macromolecules in solution.

Wüthrich has held numerous endowed lectureships and visiting faculty appointments in the USA, Japan, India and Europe. He is a Foreign Associate of the US National Academy of Sciences, a Foreign Fellow of the Indian National Science Academy and a Member of the Deutsche Akademie der Naturforscher Leopoldina. The numerous recognitions for his work include the Stein and Moore Award, the Louisa Gross Horwitz Prize, the Marcel Benoist Prize, the Prix Louis Jeantet de Medicine and most recently, the Nobel Prize in Chemistry 2002.
