

David K Levine is Professor of Economics at Washington University in St. Louis. He is co-editor of *Econometrica*, co-editor of *NAJ Economics*, President of the Society for Economic Dynamics, fellow of the Econometric Society, research associate of the NBER, member of the American Economic Association Honors and Awards Committee, and member of the Sloan Research Fellowship Program Committee. He has published extensively in professional journals, including *The American Economic Review*, *Econometrica*, *The Review of Economic Studies*, *The Journal of Political Economy*, *The Journal of Economic Theory*, *The Quarterly Journal of Economics*, and *The American Political Science Review*. *He is the author of (list books here)*. Prof. Levine's ongoing research in general equilibrium theory focuses on growth theory, innovation, and intellectual property. His other main area of research interest is dynamic games. Currently, Prof. Levine is studying the endogenous formation of preferences and social norms. He was among the first to use quantitative theory to study experimental data, using a model of signalling of intentions to explain altruism and spite in games such as ultimatum bargaining and centipede.
