

Rüdiger Kiesel heads the chair for “Energy Trading and Financial Services” at the University Duisburg-Essen. Previously he has been Director of the Institute for Mathematical Finance at the University of Ulm. He also held positions as Lecturer and Reader for actuarial science and financial mathematics at Birkbeck College, University of London and the London School of Economics, where he is still a Visiting Professor. He is also a Visiting Professor at the Center of Applied Mathematics, Oslo University. His main research areas are currently design and analysis of credit risk models, valuation and hedging of derivatives (interest-rate, credit- and energy-related), methods of risk transfer and structuring of risk (securitization), risk management for power utility companies and the stochastic modelling of financial markets using Lévy-type processes. He is co-author of the Springer Finance monograph *Risk-Neutral Valuation* (now in its second edition). Professor Kiesel also consults financial institutions and regulators on (credit- and energy-) risk management, derivative pricing models and asset allocation.
