

Contents

<i>Preface</i>	v
1. Risk Management and Financial Derivatives	1
1.1 Risk and Risk Management	1
1.2 Forward Contracts and Futures	2
1.3 Options	3
1.4 Option Pricing	5
1.5 Types of Traders	6
2. Arbitrage-Free Principle	9
2.1 Financial Market and Arbitrage-Free Principle	9
2.2 European Option Pricing and Call-Put Parity	13
2.3 American Option Pricing and Early Exercise	15
2.4 Dependence of Option Pricing on the Strike Price	19
3. Binomial Tree Methods — Discrete Models of Option Pricing	25
3.1 An Example	25
3.2 One-Period and Two-State Model	26
3.3 Binomial Tree Method of European Option Pricing (I) — Non-Dividend-Paying	32
3.4 Binomial Tree Method of European Options (II) — Dividend-Paying	39
3.5 Binomial Tree Method of American Option Pricing	42
3.6 Call-Put Symmetry	48
4. Brownian Motion and Itô Formula	55

4.1	Random Walk and Brownian Motion	55
4.2	Continuous Models of Asset Price Movement	58
4.3	Quadratic Variation Theorem	61
4.4	Itô Integral	64
4.5	Itô Formula	66
5.	European Option Pricing—Black-Scholes Formula	73
5.1	History	73
5.2	Black-Scholes Equation	74
5.3	Black-Scholes Formula	79
5.4	Generalized Black-Scholes Model (I) —Dividend-Paying Options	82
5.5	Generalized Black-Scholes Model (II) —Binary Options and Compound Options	88
5.6	Numerical Methods (I) — Finite Difference Method . . .	93
5.7	Numerical Methods (II) — Binomial Tree Method and Fi- nite Difference Method	100
5.8	Properties of European Option Price	104
5.9	Risk Management	107
6.	American Option Pricing and Optimal Exercise Strategy	113
6.1	Perpetual American Option	113
6.2	Models of American Options	124
6.3	Decomposition of American Options	127
6.4	Properties of American Option Price	134
6.5	Optimal Exercise Boundary	146
6.6	Numerical Method (I)—Finite Difference Method	165
6.7	Numerical Methods(II)—Line Method	178
6.8	Other Types of American Options	189
7.	Multi-Asset Option Pricing	201
7.1	Stochastic Models of Multi-Assets Pricing	201
7.2	Black-Scholes Equation	203
7.3	Black-Scholes Formula	204
7.4	Rainbow Options	210
7.5	Basket Options	216
7.6	Quanto Options	218
7.7	American Multi-Asset Options	222

8. Path-Dependent Options (I)	
— Weakly Path-Dependent Options	247
8.1 Barrier Options	247
8.2 Time-Dependent Barrier Options	255
8.3 Reset Options	260
8.4 Modified Barrier Options	263
9. Path-Dependent Options (II)	
— Strongly Path-Dependent Options	275
9.1 Asian Options	275
9.2 Model and Simplification	277
9.3 Valuation Formula for European-Style Geometric Average Asian Option	284
9.4 Call-Put Parities for Asian Options	288
9.5 Lookback Option	292
9.6 Numerical Methods	301
10. Implied Volatility	311
10.1 Preliminaries	311
10.2 Dupire Method	313
10.3 Optimal Control Method	315
10.4 Numerical Method	320
<i>Bibliography</i>	323
<i>Index</i>	327
