|--|-------------|
| <b>Preface</b>   | <b>xi</b>   |
| <b>Acknowledgement</b>   | <b>xiii</b> |
| <b>Introduction</b>  | <b>xv</b>   |
| 0.1. Plan of the Book . . . . .  | xv          |
| 0.2. Some Basic Concepts . . . . .   | xviii       |
| 0.2.1. Channels of interdependence . . . . .                                 | xviii       |
| 0.2.2. The balance of payments and the money<br>supply . . . . .             | xix         |
| 0.2.3. Exchange rate regimes . . . . .                                       | xxi         |
| 0.2.4. Real versus nominal exchange rates and<br>parity conditions . . . . . | xxii        |
| 0.2.5. International financial institutions . . . . .                        | xxiv        |

|               |   |           |
|---------------|---|-----------|
| <b>Part I</b> | <b>Currency Crisis Models</b>                         | <b>1</b>  |
| <b>1.</b>     | <b>The First Generation</b>                           | <b>3</b>  |
| 1.1           | Historical Background . . . . .                       | 3         |
| 1.2           | The Flood–Garber Model . . . . .                      | 6         |
| 1.2.1.        | Equations . . . . .                                   | 7         |
| 1.3           | The Shadow Exchange Rate . . . . .                    | 10        |
| 1.4           | Applications . . . . .                                | 11        |
| 1.5           | Caveats and Extensions . . . . .                      | 12        |
| <b>2.</b>     | <b>Second-Generation Currency Crisis Models</b>       | <b>15</b> |
| 2.1.          | Background . . . . .                                  | 15        |
| 2.2.          | The Barro–Gordon Model . . . . .                      | 20        |
| 2.2.1.        | A closed economy version . . . . .                    | 21        |
| 2.2.2.        | The open economy . . . . .                            | 24        |
| 2.3.          | An Influential Second-Generation Model . . . . .      | 27        |
| 2.3.1.        | Key assumptions . . . . .                             | 27        |
| 2.3.2.        | The model . . . . .                                   | 27        |
| 2.4.          | A More General Second-Generation Model . . . . .      | 32        |
| 2.5.          | Empirical Applications . . . . .                      | 34        |
| 2.6.          | Critique of Models with Multiple Equilibria . . . . . | 36        |
| 2.6.1.        | The Morris and Shin model . . . . .                   | 36        |
| 2.6.2.        | Discussion . . . . .                                  | 38        |
| <b>3.</b>     | <b>Currency Crises and Contagion in Asia</b>          | <b>40</b> |
| 3.1.          | The Shock of the Asian Crises of 1997–1998 . . . . .  | 40        |
| 3.2.          | A Third-Generation Model . . . . .                    | 46        |
| 3.2.1.        | Key assumptions . . . . .                             | 47        |
| 3.2.2.        | Equations of the model . . . . .                      | 47        |
| 3.2.3.        | Notes on third-generation models . . . . .            | 51        |
| 3.2.4.        | Policy conclusions . . . . .                          | 52        |
| 3.3.          | Contagion Effects . . . . .                           | 53        |
| 3.3.1.        | Background . . . . .                                  | 53        |

|   |    |
|---|----|
| 3.3.2. A currency crisis model with contagion . . . . | 54 |
| 3.3.3. Other channels for contagion . . . . .         | 58 |
| 3.3.4. Empirical work . . . . .                       | 59 |
| 3.3.5. Herding models . . . . .                       | 59 |

**Part II International Economic Policy Coordination 61**

**4. Is Policy Coordination Desirable? 63**

|   |    |
|---|----|
| 4.1. Interdependence . . . . .                        | 63 |
| 4.2. A Simple Model of Monetary Policy Coordination . | 67 |
| 4.3. Extensions . . . . .                             | 72 |
| 4.3.1. How to enforce the cooperative solution? . .   | 72 |
| 4.3.2. Cooperation can be welfare deteriorating . .   | 73 |

**5. Sustaining Coordination 76**

|   |    |
|---|----|
| 5.1. Obstacles to Achieving Policy Coordination . . . . | 76 |
| 5.2. Conflict over Objectives . . . . .                 | 76 |
| 5.3. Model Uncertainty and/or Disagreement . . . . .    | 78 |
| 5.4. Institutions for Fostering Coordination . . . . .  | 81 |
| 5.4.1. One-sided exchange rate pegs . . . . .           | 82 |

**Part III Common Currency Areas 85**

**6. Monetary Integration 87**

|   |    |
|---|----|
| 6.1. Choice of Currency Regime . . . . .              | 87 |
| 6.1.1. Fixed versus flexible exchange rates . . . . . | 88 |
| 6.1.2. Optimum currency areas . . . . .               | 88 |
| 6.1.3. Formal models of currency unions . . . . .     | 90 |

|                |   |            |
|----------------|---|------------|
| 6.1.4.         | Types of monetary integration . . . . .   | 90         |
| 6.1.5.         | Why modelling fiscal/monetary interaction is important . . . . .                    | 91         |
| 6.1.6.         | Recent models of fiscal/monetary policy interaction in a common currency area . . . | 93         |
| 6.2.           | Monetary Union with a Dependent CB . . . . .  | 95         |
| 6.2.1.         | The supply equation . . . . .   | 95         |
| 6.2.2.         | The government's budget constraint . . . . .  | 96         |
| 6.2.3.         | The government's objective function . . . . .                                       | 97         |
| 6.2.4.         | Optimal fiscal policy . . . . .   | 97         |
| 6.2.5.         | Optimal monetary policies . . . . .   | 98         |
| 6.3.           | Choice of Monetary Regime . . . . .   | 99         |
| 6.4.           | Utility of Existing Members of a Monetary Union . . . . .                           | 103        |
| 6.5.           | Feasible Monetary Regimes . . . . .   | 105        |
| 6.6.           | Appendix . . . . .  | 108        |
| <b>7.</b>      | <b>Monetary Union with an Independent Central Bank</b>                              | <b>111</b> |
| 7.1.           | Monetary Policy Independence . . . . .  | 111        |
| 7.2.           | A Model of an Independent Central Bank . . . . .                                    | 112        |
| 7.2.1.         | The objective functions . . . . .   | 113        |
| 7.2.2.         | Independent currencies . . . . .  | 114        |
| 7.2.3.         | Monetary union with fiscal authorities acting first . . . . .                       | 118        |
| 7.2.4.         | Fiscal policy coordination . . . . .  | 121        |
| 7.2.5.         | Alternative institutional arrangements . . . . .                                    | 122        |
| <b>Part IV</b> | <b>Sovereign Debt</b>   | <b>125</b> |
| <b>8.</b>      | <b>Why do Sovereigns Repay Their Debts?</b>   | <b>127</b> |
| 8.1.           | Background . . . . .  | 127        |
| 8.2.           | Deterministic Income Fluctuations . . . . .   | 137        |

|            |   |            |
|------------|---|------------|
| 8.3.       | Limits to Reputational Arguments . . . . .  | 142        |
| 8.4.       | Debt Renegotiation . . . . .  | 143        |
| <b>9.</b>  | <b>Uncertainty and Credit Rationing</b>   | <b>145</b> |
| 9.1.       | Basic Issues . . . . .  | 145        |
| 9.2.       | Exogenous Effort but Stochastic Costs<br>of Default . . . . .                                   | 147        |
| 9.2.1.     | A benchmark case: Riskless lending . . . . .  | 147        |
| 9.2.2.     | Credit rationing with shared debt forgiveness   | 147        |
| 9.2.3.     | Lenders do not ration credit . . . . .  | 148        |
| 9.2.4.     | Rationing with potential penalisation . . . . .   | 149        |
| 9.2.5.     | Summary . . . . .   | 151        |
| 9.3.       | Endogenous Effort on the Part of<br>the Borrower . . . . .                                      | 152        |
| 9.3.1.     | Debt overhang . . . . .   | 152        |
| 9.3.2.     | Precommitment . . . . .   | 152        |
| 9.3.3.     | Lack of commitment . . . . .  | 153        |
| <b>10.</b> | <b>Conclusion: Challenges to the International<br/>Monetary System and Prospects for Reform</b> | <b>154</b> |
| 10.1.      | Relevance of the Analysis for the Future . . . . .  | 154        |
| 10.2.      | Recent Changes to the Environment for<br>International Finance . . . . .                        | 155        |
| 10.2.1.    | Exchange rate regimes . . . . .   | 155        |
| 10.2.2.    | The maturing of emerging market debt<br>as an asset class . . . . .                             | 157        |
| 10.2.3.    | Reduction in the role of official institutions<br>in resolving crises . . . . .                 | 158        |
| 10.3.      | Continuing Challenges . . . . .   | 159        |
| 10.3.1.    | The plight of the poorest countries . . . . .   | 160        |
| 10.3.2.    | Global imbalances . . . . .   | 160        |
| 10.3.3.    | The decline in multilateralism . . . . .  | 162        |

|   |            |
|---|------------|
| 10.4. Reform Proposals . . . . .  | 163        |
| 10.4.1. The rationale for the existing role<br>of the IMF . . . . .       | 164        |
| 10.4.2. A world bankruptcy tribunal for sovereign<br>borrowers? . . . . . | 165        |
| 10.4.3. An international LOLR? . . . . .                                  | 166        |
| 10.4.4. Changing the terms of loan contracts . . . .                      | 167        |
| 10.5. Whither International Financial Architecture? . . .                 | 168        |
| <b>Bibliography</b>   | <b>169</b> |
| <b>Index</b>  | <b>175</b> |
