

## Profile of Yoshimi Goda

Dr. Yoshimi Goda worked at the Port and Harbour Research Institute, a national laboratory, for 31 years and served as the Director General for two years. He then joined the Faculty of Engineering of Yokohama National University for two years. Upon his retirement in March 2000 he was given the title of Professor Emeritus.

He is a pioneer in the field of engineering applications of random sea waves as exemplified by his book “Random Seas and Design of Maritime Structures,” the third edition of which will be published in 2010 from the World Scientific. For his distinguished research accomplishments, he has received the International Coastal Engineering Award of the American Society of Civil Engineers in 1989 and many other awards. He is a recipient of the Middle Order of Sacred Treasure with blue ribbon awarded by the Emperor of Japan.
