<b>Preface</b>	<b>v</b>
<b>Acknowledgements</b>	<b>vii</b>
<b>List of Symbols</b>	<b>ix</b>
<b>1 Introduction</b>	<b>1</b>
1.1 What is this Book About?	1
1.2 Why this Book?	7
1.3 Who is this Book Intended for?	11
1.4 How is this Book Organised?	15
<b>2 Morphodynamic Feedback</b>	<b>18</b>
2.1 Pattern Generation	18
2.2 Time-Symmetry Breaking	20
2.2.1 <i>Wave Asymmetry</i>	20
2.2.2 <i>Tidal Asymmetry</i>	23
2.3 Spatial Symmetry Breaking	29
2.3.1 <i>Morphodynamic Feedback to Seabed Perturbation</i>	29
2.3.2 <i>Stability</i>	34
2.4 Linear Stability Analysis	38
2.4.1 <i>Perturbation Growth Towards a Finite Amplitude</i>	43
2.5 Instability of a Two-Channel System	48
2.5.1 <i>History of the Rhine Delta</i>	49
2.5.2 <i>Principles of Channel Competition</i>	54
2.5.3 <i>The Ameland-Reef Cycle</i>	61
2.6 How Does the Sea Shape the Land?	64

<b>3</b>	<b>Current-Topography Interaction</b>	<b>65</b>
3.1	Abstract	65
3.2	Bed-Flow Interaction	68
3.2.1	<i>Flow Layers</i>	68
3.2.2	<i>Sediment Characteristics</i>	80
3.2.3	<i>Cohesive Sediment</i>	86
3.2.4	<i>Sediment Transport</i>	92
3.2.5	<i>Bed Evolution</i>	99
3.3	Dunes and Ripples	101
3.3.1	<i>Qualitative Description</i>	101
3.3.2	<i>Feedback Mechanism</i>	107
3.3.3	<i>The Dune Genesis Model of Engelund and Fredsøe</i>	111
3.3.4	<i>Formation of Bottom Ripples</i>	124
3.3.5	<i>Genesis of Antidunes</i>	130
3.3.6	<i>Wave-Induced Ripples</i>	132
3.4	Sand Banks	135
3.4.1	<i>Qualitative Description</i>	135
3.4.2	<i>Tidal Sand Ridges</i>	139
3.4.3	<i>Zimmerman's Qualitative Ridge Formation Model</i>	142
3.4.4	<i>Huthnance's Analytic Ridge Formation Model</i>	148
3.4.5	<i>Shoreface-Connected Ridges</i>	156
3.4.6	<i>Trowbridge's Model for Shoreface-Connected Ridges</i>	161
3.5	Channel Bars and Meanders	166
3.5.1	<i>Laterally Bounded Flow</i>	166
3.5.2	<i>Formation of Bars</i>	170
3.5.3	<i>A Simple Model for Alternating-Bar Formation</i>	173
3.5.4	<i>Channel Meandering</i>	184
3.6	Will Seabed Perturbations Always Grow?	194
<b>4</b>	<b>Tide-Topography Interaction</b>	<b>197</b>
4.1	Abstract	197
4.2	Description of Tidal Inlets	198
4.2.1	<i>Origin and Evolution</i>	198
4.2.2	<i>Barrier Tidal Inlets</i>	202
4.2.3	<i>River Tidal Inlets</i>	205
4.2.4	<i>Comparison of Barrier and River Inlet Morphology</i>	208

4.2.5	<i>Other Inlet Types</i>	210
4.2.6	<i>Critical Flow Strength</i>	211
4.3	Tides	223
4.3.1	<i>Tide Generation</i>	223
4.3.2	<i>Tide Propagation</i>	226
4.3.3	<i>Tidal Asymmetry</i>	235
4.4	Tidal Propagation in a Few Selected Basins	241
4.4.1	<i>Seine</i>	242
4.4.2	<i>Western Scheldt</i>	247
4.4.3	<i>Rotterdam Waterway and Rhine Tidal River</i>	254
4.4.4	<i>Eastern Scheldt Tidal Basin</i>	258
4.4.5	<i>Comparison</i>	264
4.5	Equilibrium of River Tidal Inlets	266
4.5.1	<i>Residual Sediment Transport</i>	266
4.5.2	<i>Equilibrium Inlet Morphology</i>	272
4.5.3	<i>Other Phenomena Influencing Sediment Transport</i>	276
4.6	Equilibrium of Barrier Tidal Inlets	279
4.6.1	<i>Equilibrium Morphology</i>	279
4.6.2	<i>Morphodynamic Stability</i>	290
4.6.3	<i>Tidal Basin Response to Change</i>	295
4.7	Transport of Fine Sediment	302
4.7.1	<i>Tidal Dispersion</i>	303
4.7.2	<i>Estuarine Circulation</i>	310
4.7.3	<i>Tidal Asymmetry</i>	315
<b>5</b>	<b>Wave-Topography Interaction</b>	<b>325</b>
5.1	Abstract	325
5.2	Morphodynamics of Sandy Coasts	327
5.2.1	<i>Morphology of the Sea-Land Transition Zone</i>	327
5.2.2	<i>Wind Waves over a Shallow Seabed</i>	335
5.2.3	<i>Response to Sea-Level Rise</i>	342
5.2.4	<i>Large-Scale Coastal Behaviour</i>	344
5.2.5	<i>Pattern Formation</i>	345
5.3	Wave Theory	348
5.3.1	<i>Linear Theory</i>	349
5.3.2	<i>Wave Deformation</i>	351

5.3.3	<i>Wave-Induced Residual Flow</i>	354
5.3.4	<i>Longshore Transport</i>	356
5.4	Shoreline Dynamics	358
5.4.1	<i>Large-Scale Shoreline Adaptation</i>	358
5.4.2	<i>Shoreline Patterns</i>	365
5.4.3	<i>Beach Cusps</i>	381
5.5	Coastal Profile Dynamics	386
5.5.1	<i>Shoreface Profile Models</i>	387
5.5.2	<i>Influence of Wave Breaking</i>	393
5.5.3	<i>Response to Perturbation: Shoreface Nourishment</i>	408
5.5.4	<i>Conclusion</i>	414
<b>6</b>	<b>Epilogue</b>	<b>415</b>
6.1	Progress in Understanding	415
6.2	Working with Nature	417
6.3	Future Challenges	418
<b>Appendix A</b>	<b>Basic Equations of Fluid Motion</b>	<b>423</b>
A.1	General Nature of the Basic Equations	423
A.2	Water Motion in Three Dimensions	426
A.3	Horizontal Flow Equations	427
A.4	Earth's Rotation	428
A.5	Vorticity Balance	430
<b>Appendix B</b>	<b>Tidal Propagation in One Dimension</b>	<b>431</b>
B.1	1D Tidal Equations	431
B.2	Scale Analysis	435
B.3	Linear Tides in a Uniform Channel	438
B.4	Tidal River with Strong Friction	445
B.5	Nonlinear Tides in a Uniform Channel	448
B.6	Tidal Wave in a Uniform Basin of Finite Length	457
B.7	Strongly Converging Tidal Basins	464
<b>Appendix C</b>	<b>Tidal Propagation in Coastal Seas</b>	<b>470</b>
C.1	Linear Tide	470
C.2	Tidal Distortion Along the Coast	474
