Preface	v
Chapter 1 Application of a Magnetic Field for Materials Processing	1
Chapter 2 Natural Convection of Liquid Metal without a Magnetic Field	3
2.1 Two-Dimensional Computation of Oscillatory Natural Convection of Low-Prandtl-Number Fluid Heated from Below	3
2.2 Experimental Heat Transfer Rates of Rayleigh-Benard Oscillatory Natural Convection of Liquid Gallium Heated from Below	7
2.3 Three-Dimensional Computation of Natural Convection in a Shallow Rectangular Region Heated from Below	10
2.4 Closing Remarks	13
Chapter 3 Two-Dimensional Numerical Analyses for Natural Convection of Liquid Metal in a Magnetic Field	15
3.1 Two-Dimensional Numerical Computations in a Vertical Magnetic Field	15
3.2 Two-Dimensional Analysis for a Lateral Magnetic Field	20
Chapter 4 Three-Dimensional Natural Convection of Liquid Metal in a Cubical Enclosure with a Magnetic Field	25
4.1 The Effect of the Direction of the External Magnetic Field	25
4.2 Experimental Results for Molten Gallium under an External Magnetic Field in the <i>X</i> , <i>Y</i> or <i>Z</i> Direction	30
4.3 Summary	35
Appendix A	35
Appendix B	37
Chapter 5 Enhanced Heat Transfer Rate of Natural Convection Due to a Magnetic Field	41
5.1 Three-Dimensional Numerical Analyses	41
5.2 Further Experimental Measurement for the <i>Y</i> -Directional Magnetic Field	48
Appendix	50

Chapter 6 Natural Convection of Liquid Metal in a Cube with the Seebeck Effect Under a Magnetic Field	51
6.1 Introduction	51
6.2 Mathematical Model	51
6.3 Computed Results	53
6.4 Discussion	56
6.5 Conclusions	57
Chapter 7 Flow Visualization of Oscillatory Czochralski Convection	59
7.1 Introduction	59
7.2 Experiments	60
7.3 Conclusions	65
Chapter 8 Liquid Encapsulated Czochralski Bulk Flow with Flow Visualization	67
8.1 Introduction	67
8.2 Mathematical Model Equations	68
8.3 Experimental Set-up and Conditions for Flow Visualization	69
8.4 Results and Discussion	71
8.5 Conclusions	76
Chapter 9 Effect of Radiation Cooling from a Free Surface in Czochralski Melt Flow	79
9.1 Introduction	79
9.2 The System and Model Equations	80
9.3 Computational Schemes	82
9.4 Computed Results	83
9.5 Conclusions	89
Chapter 10 Effect of an Axial Magnetic Field on the Melt Convection of Czochralski Crystal Growth	91
10.1 Introduction	92
10.2 Computed Results for a Static Crucible	94
10.3 Computed Results for a Rotating Crucible	97
10.4 Summary of the Results in an Axial Magnetic Field	98

Chapter 11 Effect of a Transverse Magnetic Field on the Melt Convection of Czochralski Crystal Growth	99
11.1 Introduction	99
11.2 Model System	100
11.3 Computational Schemes	103
11.4 Computed Results	104
11.5 Experimental Measurement of Temperature	106
11.6 Elliptic Temperature Profile in a Transverse Magnetic Field	107
11.7 Conclusions	111
Chapter 12 Effect of a Cusp-Shaped Magnetic Field on the Melt Convection of Czochralski Crystal Growth	113
12.1 Introduction	113
12.2 Numerical Analysis	114
12.3 Results and Discussion	118
12.4 Conclusions	122
Chapter 13 Effect of a Rotating Magnetic Field on the Melt Convection of Czochralski Crystal Growth	125
13.1 Introduction	125
13.2 Model System	126
13.3 Computational Schemes	127
13.4 Computed Results	128
13.5 Conclusions	130
Chapter 14 Continuous Steel-Casting Systems with Various Magnetic Fields	131
14.1 Introduction	131
14.2 Model Systems	132
14.3 Computed Results	135
14.4 Conclusions	138
Chapter 15 Convection Induced by a Cusp-Shaped Magnetic Field for Air in a Cube Heated from Above and Cooled from Below	139
15.1 Introduction	139
15.2 Derivation of Magnetizing Force Model for Paramagnetic Gas	140
15.3 Computed Results	143

15.4	Experimental Flow Visualization	149
15.5	Conclusions	150
Chapter 16	Rayleigh-Benard Convection of Air in a Magnetic Field	151
16.1	Introduction	151
16.2	Experiments	152
16.3	Numerical Analyses	155
16.4	Discussion	159
16.5	Conclusions	160
Chapter 17	Effects of Various Parameters on the Convection of Air in a Cubic Enclosure Under a Magnetic Field	163
17.1	Effect of the Direction of the Magnetic Field	163
17.2	Effect of γ and Ra	168
17.3	Effect of the Number of Coils	172
Chapter 18	Transient Characteristics of Convection and Diffusion of Oxygen Gas in an Open Vertical Cylinder Under Magnetizing Forces	175
18.1	Experiments	175
18.2	Derivation of Model Equation	176
18.3	Computed Result	179
18.4	Conclusions	182
Chapter 19	Rayleigh-Benard Convection of Diamagnetic Fluid	183
19.1	Introduction	183
19.2	Derivation of Model Equation	184
19.3	Model Systems and Computed Result	185
19.4	Discussion	189
19.5	Conclusions	191
Chapter 20	Magnetothermal Wind Tunnel	193
20.1	Introduction	193
20.2	Numerical Methods	195
20.3	Results and Discussion	197
20.4	Conclusions	202

Appendix	205
Nomenclature	207
