

R E Benestad, a physicist by training, is affiliated with the Norwegian Meteorological Institute (met.no). He has a D.Phil in physics from Atmospheric, Oceanic & Planetary Physics at Oxford University (UK), a MS in physics from New Mexico Institute of Mining and Technology (USA), and a BSc hon in Physics and Electronics from University of Manchester Institute of Science and Technology (UK). Recent work involve statistics (empirical-statistical downscaling, trend analysis, model validation, extremes and record values), but he also has work experience in other fields such as cloud micro-physics, ocean dynamics/air-sea processes, solar-climate relations, and seasonal forecasting.
