

CONTENTS

Preface	v
Chapter 1. Theory of Molecular Multiphoton Transitions	1
<i>Y. Fujimura</i>	
Chapter 2. Photochemistry, Photophysics and Spectroscopy of Molecular Infrared Multiple Photon Excitation	79
<i>J. S. Francisco and J. I. Steinfeld</i>	
Chapter 3. Dynamics and Symmetries in Intense Field Multiphoton Processes: Floquet Theoretical Approaches	175
<i>Shih-I Chu</i>	
Chapter 4. Time-Resolved Resonance Raman Spectroscopy	239
<i>W. Hub, S. Schneider and F. Dörr</i>	
Chapter 5. Detection and Spectroscopy of Methyl and Substituted Methyl Radicals by Resonance Enhanced Multiphoton Ionization	333
<i>M. C. Lin and W. A. Sanders</i>
