PREFACE	xi
1	
INTRODUCTION TO WAVE MECHANICS	1
1.1 Introduction, 2	
1.2 Characteristics of Waves, 2	
1.3 Historical and Present Literature, 4	
2	
A REVIEW OF HYDRODYNAMICS AND VECTOR ANALYSIS	6
2.1 Introduction, 7	
2.2 Review of Hydrodynamics, 7	
2.3 Review of Vector Analysis, 19	
2.4 Cylindrical Coordinates, 32	
References, 36	
Problems, 37	
3	
SMALL-AMPLITUDE WATER WAVE THEORY FORMULATION AND SOLUTION	41
3.1 Introduction, 42	
3.2 Boundary Value Problems, 42	

- 3.3 Summary of the Two-Dimensional Periodic Water Wave Boundary Value Problem, 52
- 3.4 Solution to Linearized Water Wave Boundary Value Problem for a Horizontal Bottom, 53
- 3.5 Appendix: Approximate Solutions to the Dispersion Equation, 71
References, 73
Problems, 73

4

ENGINEERING WAVE PROPERTIES

78

- 4.1 Introduction, 79
- 4.2 Water Particle Kinematics for Progressive Waves, 79
- 4.3 Pressure Field Under a Progressive Wave, 83
- 4.4 Water Particle Kinematics for Standing Waves, 86
- 4.5 Pressure Field Under a Standing Wave, 89
- 4.6 Partial Standing Waves, 90
- 4.7 Energy and Energy Propagation in Progressive Waves, 93
- 4.8 Transformation of Waves Entering Shallow Water, 100
- 4.9 Wave Diffraction, 116
- 4.10 Combined Refraction-Diffraction, 123
References, 124
Problems, 126

5

LONG WAVES

131

- 5.1 Introduction, 132
- 5.2 Asymptotic Long Waves, 132
- 5.3 Long Wave Theory, 133
- 5.4 One-Dimensional Tides in Idealized Channels, 138
- 5.5 Reflection and Transmission Past an Abrupt Transition, 141
- 5.6 Long Waves with Bottom Friction, 146
- 5.7 Geostrophic Effects on Long Waves, 154
- 5.8 Long Waves in Irregular-Shaped Basins or Bays, 157
- 5.9 Storm Surge, 157
- 5.10 Long Waves Forced by a Moving Atmospheric Pressure Disturbance, 163
- 5.11 Long Waves Forced by a Translating Bottom Displacement, 166
References, 167
Problems, 167

6

WAVEMAKER THEORY

170

- 6.1 Introduction, *170*
- 6.2 Simplified Theory for Plane Wavemakers in Shallow Water, *171*
- 6.3 Complete Wavemaker Theory for Plane Waves Produced by a Paddle, *172*
- 6.4 Cylindrical Wavemakers, *180*
- 6.5 Plunger Wavemakers, *184*
 - References, *185*
 - Problems, *185*

7

WAVE STATISTICS AND SPECTRA

187

- 7.1 Introduction, *187*
- 7.2 Wave Height Distributions, *188*
- 7.3 The Wave Spectrum, *193*
- 7.4 The Directional Wave Spectrum, *202*
- 7.5 Time-Series Simulation, *207*
- 7.6 Examples of Use of Spectral Methods to Determine Momentum Flux, *208*
 - References, *209*
 - Problems, *210*

8

WAVE FORCES

212

- 8.1 Introduction, *212*
- 8.2 Potential Flow Approach, *213*
- 8.3 Forces Due to Real Fluids, *221*
- 8.4 Inertia Force Predominant Case, *237*
- 8.5 Spectral Approach to Wave Force Prediction, *254*
 - References, *255*
 - Problems, *257*

9

WAVES OVER REAL SEABEDS

261

- 9.1 Introduction, *261*
- 9.2 Waves Over Smooth, Rigid, Impermeable Bottoms, *262*
- 9.3 Water Waves Over a Viscous Mud Bottom, *271*

- 9.4 Waves Over Rigid, Porous Bottoms, 277
 References, 282
 Problems, 282

10

NONLINEAR PROPERTIES DERIVABLE FROM SMALL-AMPLITUDE WAVES **284**

- 10.1 Introduction, 285
 10.2 Mass Transport and Momentum Flux, 285
 10.3 Mean Water Level, 287
 10.4 Mean Pressure, 288
 10.5 Momentum Flux, 289
 10.6 Summary, 293
 References, 293
 Problems, 294

11

NONLINEAR WAVES **295**

- 11.1 Introduction, 296
 11.2 Perturbation Approach of Stokes, 296
 11.3 The Stream Function Wave Theory, 305
 11.4 Finite-Amplitude Waves in Shallow Water, 309
 11.5 The Validity of Nonlinear Wave Theories, 322
 References, 324
 Problems, 325

12

A SERIES OF EXPERIMENTS FOR A LABORATORY COURSE COMPONENT IN WATER WAVES **326**

- 12.1 Introduction, 326
 12.2 Required Equipment, 326
 12.3 Experiments, 330
 References, 345

SUBJECT INDEX **347**

AUTHOR INDEX **351**
