

CONTENTS

Foreword		v
Introduction		1
 I Phase Transitions and Continuous Symmetry Breaking		
[I.1]	“Phase transitions, Goldstone bosons and topological superselection rules”, in <i>Schladming Lectures</i> , 1976, P. Urban (ed.); <i>Acta Phys. Austriaca Suppl.</i> 15 (1976) 133–269.	27
[I.2]	“The pure phases (harmonic functions) of generalized processes” or “Mathematical physics of phase transitions and symmetry breaking”, <i>Bull. Amer. Math. Soc.</i> 84 (1978) 165–193.	164
[I.3]	“Spontaneously broken and dynamically enhanced global and local symmetries”, in <i>Unified Theories of Elementary Particles. Critical Assessment and Prospects</i> , P. Breitenlohner and H.P. Dürr (eds.), pp. 117–136, Springer Lecture Notes in Physics 160 .	193
 II Non-Perturbative Quantization of Topological Solitons		
[II.1]	“Quantum theory of non-linear invariant wave (field) equations” or “Super selection sectors in constructive quantum field theory”, in <i>Invariant Wave Equations</i> , G. Velo and A.S. Wightman (eds.), pp. 339–413, Springer Lecture Notes in Physics 73 .	215
[II.2]	with P.-A. Marchetti, “Bosonization, topological solitons and fractional charges in two-dimensional quantum field theory”, <i>Commun. Math. Phys.</i> 116 (1988) 127–173.	290
[II.3]	with P.-A. Marchetti, “Quantum skyrmions”, <i>Nucl. Phys.</i> B335 (1990) 1–22.	337
[II.4]	with M. Struwe, “Variational problems on vector bundles”, <i>Commun. Math. Phys.</i> 131 (1990) 431–464.	359
 III Gauge Theories, including (the Infrared Problem in) Quantum Electrodynamics		
[III.1]	with G. Morchio and F. Strocchi, “Charged sectors and scattering states in quantum electrodynamics”, <i>Ann. Phys. (N.Y.)</i> 119 (1979) 241–284.	395

[III.2]	with P.-A. Marchetti, "Magnetic monopoles and charged states in four-dimensional, abelian lattice gauge theories", <i>Europhysics Letters</i> 2 (1986) 933–940.	439
[III.3]	"Some results and comments on quantized gauge fields", in <i>Recent Developments in Gauge Theories</i> , G. 't Hooft et al (eds.), pp. 53–82.	447
[III.4]	"Some comments on the crossover between strong and weak coupling in SU(2) pure Yang-Mills theory", <i>Phys. Rep.</i> 67 (1980) 137–149.	477
[III.5]	with P.-A. Marchetti, "Quantum field theory of anyons", <i>Lett. Math. Phys.</i> 16 (1988) 347–358.	490
IV Triviality of $\lambda\varphi^4$		
[IV.1]	"On the triviality of $\lambda\varphi_d^4$ theories and the approach to the critical point in $d \geq 4$ dimensions", <i>Nucl. Phys.</i> B200 [FS4] (1982) 281–296.	505
V Random Geometry (Quantum Gravity and Strings)		
[V.1]	"Regge calculus and discretized gravitational functional integrals", I.H.E.S. Preprint (1981).	523
[V.2]	"The statistical mechanics of surfaces", in <i>Applications of Field Theory to Statistical Mechanics</i> , L. Garrido (ed.), pp. 31–57, Springer Lecture Notes in Physics 216 .	546
VI Low-Dimensional QFT: Two-Dimensional Conformal Field Theory, Three-Dimensional (Gauge) Theories		
[VI.1]	"Statistics of fields, the Yang-Baxter equation, and the theory of knots and links", in <i>Nonperturbative Quantum Field Theory</i> , G. 't Hooft, A. Jaffe, G. Mack, P.K. Mitter, and R. Stora (eds.), pp. 71–100.	575
[VI.2]	"Statistics and monodromy in two- and three-dimensional quantum field theory", in <i>Differential Geometric Methods in Theoretical Physics</i> , K. Bleuler and M. Werner (eds.), pp. 173–186.	605
[VI.3]	"On the structure of (unitary) rational conformal field theory", in <i>Proceedings of the LAPP Meeting on Conformal Field Theory</i> , <i>Nucl. Phys. B</i> (Proc. Suppl.) 5B (1988) 110–118.	620
[VI.4]	"New developments in quantum field theory", in <i>Proceedings of the XXIV International Conference on High Energy Physics</i> , R. Kotthaus and J. Kuhn (eds.), pp. 219–249.	629

-
- [VI.5] with C. King, “Two-dimensional conformal field theory and three-dimensional topology”, *Internat. J. Modern Phys. A* **4** (1989) 5321–5399; also in *Proceedings of the Erice Summer School*, 1988, G. Velo and A.S. Wightman (eds.). 660
- [VI.6] “Quantum statistics and locality”, in *Proceedings of The Gibbs Symposium*, D.G. Caldi and G.D. Mostow (eds.), pp. 89–142. 739
- [VI.7] with T. Kerler, “Universality in quantum Hall systems”, *Nucl. Phys. B* **354** (1991) 369–417. 793
