

CONTENTS

Preface	v
Introduction	vii
Part I Electrostatics	
1. Basic Laws of Electrostatics (1001–1023)	3
2. Electrostatic Field in a Conductor (1024–1042)	26
3. Electrostatic Field in a Dielectric Medium (1043–1061)	48
4. Typical Methods for Solution of Electrostatic Problems — Separation of Variables, Methods of Images, Green's Function and Multipole Expansion (1062–1095)	72
5. Miscellaneous Applications (1096–1108)	120
Part II Magnetostatic Field and Quasi-Stationary Electromagnetic Fields	
1. Magnetic Field of Currents (2001–2038)	147
2. Electromagnetic Induction (2039–2063)	193
3. Action of Electromagnetic Field on Current-Carrying Conductors and Charged Particles (2064–2090)	220
4. Miscellaneous Applications (2091–2119)	260
Part III Circuit Analysis	
1. Basic Circuit Analysis (3001–3026)	315
2. Electric and Magnetic Circuits (3027–3044)	350
3. Analog Circuits (3045–3057)	367
4. Digital Circuits (3058–3065)	379
5. Nuclear Electronics (3066–3082)	385
6. Miscellaneous Problems (3083–3090)	404

Part IV Electromagnetic Waves

- | | |
|--------------------------------------------------------------------------------------------------|-----|
| 1. Plane Electromagnetic Waves (4001–4009) | 423 |
| 2. Reflection and Refraction of Electromagnetic Waves on Interface between Two Media (4010–4024) | 439 |
| 3. Propagation of Electromagnetic Waves in a Medium (4025–4045) | 472 |
| 4. Electromagnetic Radiation and Radiating Systems (4046–4067) | 511 |

Part V Relativity, Particle-Field Interactions

- | | |
|----------------------------------------------------------------------|-----|
| 1. The Lorentz Transformation (5001–5017) | 553 |
| 2. Electromagnetic Field of a Charged Particle (5018–5025) | 580 |
| 3. Motion of a Charged Particle in Electromagnetic Field (5026–5039) | 598 |
| 4. Scattering and Dispersion of Electromagnetic Waves (5040–5056) | 630 |

- | | |
|-------------------|-----|
| Index to Problems | 659 |
|-------------------|-----|
