<b>I</b>	<b>BASIC NOTIONS</b>	<b>1</b>
<b>1</b>	<b>Introduction to Trace Theory</b>	<b>3</b>
	(A. Mazurkiewicz)	
1.1	Introduction . . . . .	3
1.2	Preliminary Notions . . . . .	5
1.3	Dependency and Traces . . . . .	7
1.4	Dependence Graphs . . . . .	14
1.5	Histories . . . . .	19
1.6	Ordering of Symbol Occurrences . . . . .	21
1.7	Trace Languages . . . . .	27
1.8	Elementary Net Systems . . . . .	33
1.9	Conclusions . . . . .	40
<b>2</b>	<b>Dependence Graphs</b>	<b>43</b>
	(H. J. Hoogeboom, G. Rozenberg)	
2.1	Introduction . . . . .	43
2.2	Preliminary Notions . . . . .	44
2.3	Dependence Graphs via Words . . . . .	45
2.4	The Structure of Dependence Graphs . . . . .	52
2.5	Transitive Closures . . . . .	57
2.6	Graph Grammars . . . . .	64
<b>II</b>	<b>ALGEBRA AND COMBINATORICS</b>	<b>69</b>
<b>3</b>	<b>Combinatorics in Trace Monoids I</b>	<b>71</b>
	(C. Choffrut)	
3.1	Introduction . . . . .	71
3.2	Equations in Two Unknowns . . . . .	73
3.3	Conjugacy . . . . .	78
3.4	Related Topics . . . . .	80
<b>4</b>	<b>Combinatorics in Trace Monoids II</b>	<b>83</b>
	(G. Duchamp, D. Krob)	
4.1	Introduction . . . . .	84
4.2	Preliminaries . . . . .	84
4.3	Elimination for Trace Monoids . . . . .	89

4.4	Lyndon Traces . . . . .	97
4.5	Shuffle Product . . . . .	116
4.6	Exercises . . . . .	125
4.7	Some Remarks on Other Related Structures . . . . .	127
4.8	Bibliographical Remarks . . . . .	128
<b>5</b>	<b>Counting Techniques for Inclusion, Equivalence and Membership Problems</b>	<b>131</b>
	(A. Bertoni, M. Goldwurm, G. Mauri, N. Sabadini)	
5.1	Introduction . . . . .	132
5.2	Rational Trace Languages . . . . .	133
5.3	Formal Series and Generating Functions . . . . .	136
5.4	Equivalence and Inclusion Problems . . . . .	143
5.5	On Counting the Prefixes of a Trace . . . . .	149
<b>III</b>	<b>LANGUAGES AND AUTOMATA</b>	<b>165</b>
<b>6</b>	<b>Recognizable Trace Languages</b>	<b>167</b>
	(E. Ochmański)	
6.1	Monoids and Their Subsets . . . . .	168
6.2	Trace Monoids and Trace Languages . . . . .	174
6.3	Recognizable Trace Languages . . . . .	178
6.4	The Star Problem . . . . .	183
6.5	Morphisms on Trace Monoids . . . . .	190
6.6	Petri Nets and Their Behaviour . . . . .	192
6.7	Labelled Petri Nets . . . . .	196
6.8	Bibliographical Remarks . . . . .	203
<b>7</b>	<b>Asynchronous Automata</b>	<b>205</b>
	(W. Zielonka)	
7.1	Introduction . . . . .	205
7.2	Asynchronous Transition Systems . . . . .	206
7.3	Non-Interleaving Semantics of Asynchronous Transition Systems . . . . .	212
7.4	Asynchronous Cellular Transition Systems . . . . .	228
7.5	Simulations Between Asynchronous Transition Systems . . . . .	231
7.6	Language Recognizability by Asynchronous Automata . . . . .	238
7.7	Bibliographical Remarks . . . . .	246
<b>8</b>	<b>Construction of Asynchronous Automata</b>	<b>249</b>
	(V. Diekert, A. Muscholl)	
8.1	Introduction . . . . .	249
8.2	Métivier's Construction for Triangulated Dependence Graphs . . . . .	252
8.3	Asynchronous Cellular Automata for Recognizable Trace Languages . . . . .	257

8.4	Concluding Remarks . . . . .	267
-----	------------------------------	-----

## IV CONCURRENCY AND LOGIC 269

### 9 Trace Structures and other Models for Concurrency 271

(M. Nielsen, G. Winskel)

9.1	Introduction . . . . .	272
9.2	Trace Structures and Hoare Structures . . . . .	273
9.3	Trace Structures and Event Structures . . . . .	280
9.4	Trace Structures and Domains . . . . .	291
9.5	Trace Structures and Petri Nets . . . . .	293
9.6	Trace Structures and Asynchronous Transition Systems . . . . .	302
9.7	Conclusion . . . . .	305

### 10 Traces and Logic 307

(W. Penczek, R. Kuiper)

10.1	Introduction . . . . .	308
10.2	Trace Systems . . . . .	310
10.3	Comparison of Temporal Logics on Trace Systems . . . . .	325
10.4	Efficient Model Checking for a Subset of LTL . . . . .	336
10.5	Efficient Model Checking for a Subset of CTL . . . . .	347
10.6	Model Checking for $CTL_P$ . . . . .	351
10.7	Proving Program Properties using $ISTL_P$ . . . . .	361
10.8	Axiomatization of a Subset of Propositional $ISTL_P$ . . . . .	373
10.9	Conclusions . . . . .	379
10.10	Appendix: Logical Definability of Trace Languages (W. Ebinger) . . . . .	382

## V GENERALIZATIONS 391

### 11 Infinite Traces 393

(P. Gastin, A. Petit)

11.1	Introduction . . . . .	394
11.2	Real and Transfinite Traces . . . . .	397
11.3	Poset Properties of Infinite Traces . . . . .	414
11.4	Complex Traces . . . . .	422
11.5	Topology on Complex Traces . . . . .	434
11.6	Rational Languages of Infinite Traces . . . . .	441
11.7	Recognizable Real Trace Languages . . . . .	455
11.8	Recognizable Complex Trace Languages . . . . .	472

<b>12 Semi-Commutations</b>	<b>487</b>
(M. Clerbout, M. Latteux, Y. Roos)	
12.1 Introduction . . . . .	488
12.2 Preliminaries . . . . .	489
12.3 Basic Lemmas . . . . .	492
12.4 The Decomposition Theorem . . . . .	496
12.5 A Composition Criterion . . . . .	500
12.6 Recognizability and Rationality . . . . .	509
12.7 Algebraic Rational Functions . . . . .	528
12.8 Applications of Semi-Commutations . . . . .	538
12.9 Conclusion . . . . .	549
<b>Bibliography</b>	<b>553</b>
