Preface	v
Growth mechanisms of polycrystalline thin films P.B. Barna and M. Adamik	1
Heteroepitaxy H. von Känel, N. Onda and L. Miglio	29
Fundamental properties and developments of metallic and semiconducting nanoparticles A. Stella, P. Cheyssac and R. Kofman	57
Thin film deposition by means of pulsed electron beam ablation G. Müller, M. Konijnenberg, G. Krafft and C. Schultheiss	89
Bombardment stabilization of cubic boron nitride L. B. Hackenberger, L.J. Piloni and R. Messier	121
Orientation-controlled organic thin films H. Yanagi	145
Applications of spectroscopic ellipsometry to thin film characterisation B. Drévilion	189
XRD line broadening and texture of thin films P. Scardi	241
The SQUID magnetometer: an application of thin-film superconductors M.S. Colclough	279
Thin films for large area electronics D. Pribat, F. Plais, P. Legagneux and C. Reita	293
