

## CONTENTS

<b>Introduction</b>	v
<b>Preface</b>	vii
<b>1. Dynamics and Thermodynamics of Globins</b> Krzysztof Kuczera	1
<b>2. Reaction Path Studies of Biological Molecules</b> Ron Elber	65
<b>3. Optimization Techniques with Applications to Proteins</b> John E. Straub	137
<b>4. Analytical Theories of Protein Folding</b> T. Garel, H. Orland and D. Thirumalai	197
<b>5. Atomic Biology, Electrostatics, and Ionic Channels</b> R. S. Eisenberg	269
<b>6. The Statistical Mechanical Basis of Sequence Alignment Algorithms for Protein Structure Recognition</b> Richard A. Goldstein, Zaida A. Luthey-Schulten and Peter G. Wolynes	359
<b>Index</b>	389
