

# CONTENTS

## **Path and Motion Planning**

Dynamic Environmental Modeling by the C-Tree <i>K. Verbarq and H. Noltemeier</i>	3
Competitive Strategies for Autonomous Systems <i>C. Icking and R. Klein</i>	23
Boundary Extraction for Rasterized Motion Planning <i>H. Mueller</i>	41
Efficient Exact Motion Planning in Realistic Environments <i>A. F. van der Stappen</i>	51
Collision Detection: A Geometric Approach <i>P. Jimenez and C. Torras</i>	68
Robot Navigation: A Simple Guidance System for a Complex Changing World <i>E. Prassler</i>	86
Geometric Motion Design <i>M. G. Wagner and H. Pottmann</i>	104
Planning with Uncertainty of Vision <i>Y. Shirai</i>	120

## **Sensor and Action Planning**

Task-Directed Planning of Cooperating Sensors: A Framework <i>G. Grunwald</i>	143
How to Plan Under Uncertainty, and Use a Logical Action Model, Too <i>J. Hertzberg</i>	160

**Sensor Fusion**

- Fusion-Rule Estimation in Multiple Sensor Systems Using Stochastic Approximation** 179  
*N. S. V. Rao*
- Sensor Fusion and Learning for Environmental Modelling** 191  
*R. R. Murphy, J. Lindner and B. C. Taylor*

**Robot Vision**

- Applications of Fractal Image Encoding** 209  
*P. Levi, N. Mache and T. Harrer*
- Infrared Image Understanding** 223  
*C. Caillas*
- Projective Reconstruction from Multiple Uncalibrated Images** 236  
*L. Quan and R. Mohr*
- Exploration of Object Symmetries in Computer Vision and Robotics** 257  
*X.-Y. Jiang and H. Bunke*
- Function-Based Object Recognition** 272  
*L. Stark and K. W. Bowyer*
- Model-Based Multisensory Robot Vision** 289  
*H. Bunke, X.-Y. Jiang, A. Ueltschi,  
 U. Meier and R. Robmann*

**Environment Modelling and Autonomous Systems**

- Local Environment Modeling Through Integrated Stereo and Motion Analysis** 311  
*R. C. Bolles, H. H. Baker, K. G. Konolige*
- Localisation, Environmental Modelling and Path Planning for Autonomous Mobile Robot Navigation** 325  
*R. Jarvis*

Hierarchical Control for Navigation Using Heterogeneous Models <i>P. Pirjanian and H. I. Christensen</i>	344
PRIAMOS: An Advanced Mobile System for Service, Inspection, and Surveillance Tasks <i>R. Dillmann, M. Kaiser, F. Wallner and P. Weckesser</i>	362
A Distributed Control Architecture for Autonomous Robot Systems <i>T. Laengle, T. C. Lueth and U. Rembold</i>	384
Representation and Planning for Behaviour-Based Robots <i>J.-P. Muller and M. Rodriguez</i>	403
Line Based Modelling from Laser Radar Data <i>E. von Puttkamer</i>	419
Bio-Based Control for Intelligent Autonomous Systems <i>T. C. Henderson and A. A. Efros</i>	431
<b>Special Applications and Robot Control</b>	
Grasping Unknown Objects <i>F. Ade, M. Rutishauser and M. Trobina</i>	445
Image-Guided Robotic Radiosurgery <i>J. R. Adler, A. Schweikard, A. Tombropoulos and J.-C. Latombe</i>	460
A Nonlinear Circuit Theory for Physically Understanding Dextrous Robot (Human) Motions <i>S. Arimoto</i>	471
Index	489
