|--|-----------|
| Preface | xi |
| Note to the Reader | xiii |
| Acknowledgments | xiv |
| Introduction | 1 |
| Bibliography of Papers by Lotfi A. Zadeh | |
| Part A. Papers on Fuzzy Set Theory and Related Subjects | 7 |
| Part B. Other Papers | 13 |
| Selected Papers by Lotfi A. Zadeh | 17 |
| Fuzzy sets [1] | 19 |
| Fuzzy sets and systems [2] | 35 |
| Abstraction and pattern classification [3] | 44 |
| Shadows of fuzzy sets [4] | 51 |
| Fuzzy algorithms [5] | 60 |
| Note on fuzzy languages [8] | 69 |
| Towards a theory of fuzzy systems [10] | 83 |
| Quantitative fuzzy semantics [11] | 105 |
| A rationale for fuzzy control [15] | 123 |
| On fuzzy algorithms [16] | 127 |
| Fuzzy languages and their relation to human and machine intelligence [18] | 148 |
| On fuzzy mapping and control [20] | 180 |
| A system-theoretic view of behavior modification [21] | 185 |
| On the analysis of large-scale systems [24] | 195 |
| Calculus of fuzzy restrictions [26] | 210 |
| Fuzzy logic and approximate reasoning [27] | 238 |
| The linguistic approach and its application to decision analysis [29] | 260 |
| Local and fuzzy logics [30] | 283 |
| Linguistic characterization of preference relations as a basis for choice in social systems [33] | 336 |
| Fuzzy sets and their application to pattern classification and clustering analysis [34] | 355 |
| Fuzzy sets [38] | 394 |
| Fuzzy sets and information granularity [40] | 433 |
| Liar's paradox and truth-qualification principle [41] | 449 |
| Fuzzy systems theory: A framework for the analysis of humanistic systems [49] | 464 |
| Possibility theory and soft data analysis [50] | 481 |
| Test-score semantics for natural languages and meaning representation via PRUF [52] | 542 |
| A note on prototype theory and fuzzy sets [54] | 587 |

| | |
|--|-----|
| A fuzzy-set-theoretic approach to the compositionality of meaning: | |
| Propositions, dispositions and canonical forms [59] | 594 |
| Precisation of meaning via translation into PRUF [65] | 614 |
| Fuzzy probabilities [70] | 643 |
| A formalization of commonsense reasoning based on fuzzy logic [73] | 653 |
| Management of uncertainty in expert systems [75] | 658 |
| A simple view of the Dempster–Shafer theory of evidence and its implication for the rule of combination [77] | 674 |
| Outline of a computational approach to meaning and knowledge representation based on the concept of a generalized assignment statement [79] | 680 |
| Outline of a theory of usuality based on fuzzy logic [80] | 694 |
| A computational theory of dispositions [84] | 713 |
| Fuzzy sets, usuality and commonsense reasoning [85] | 738 |
| Dispositional logic [88] | 759 |
| Knowledge representation in fuzzy logic [95] | 764 |
| Fuzzy logic, neural networks and soft computing [99] | 775 |
| The role of fuzzy logic in modeling, identification and control [100] | 783 |
| Soft computing and fuzzy logic [102] | 796 |
| Probability theory and fuzzy logic are complementary rather than competitive [103] | 805 |
| The birth and evolution of fuzzy logic, soft computing, and computing with words: A personal perspective [104] | 811 |
| Subject Index | 821 |
