

TABLE of CONTENTS

CHAPTER 1	INTRODUCTION	1
CHAPTER 2	THE LORENTZ TRANSFORMATION	5
2.1	Vectors and Coordinates	5
2.2	The Lorentz Transformation	6
2.3	Simple Kinematic Results	9
2.4	General Axes	13
2.5	Relative Velocity	14
2.6	Successive Lorentz Transformations	15
2.7	The Invariant Interval	16
2.8	Past and Future: The Light Cone	17
2.9	Proper Time	18
2.10	Discussion	19
	Problems	19
CHAPTER 3	KINEMATIC AND OPTICAL EFFECTS	21
3.1	The Doppler Effect	21
3.2	The Free Electron Laser	24
3.3	The Sagnac Effect	25
3.4	Stellar Aberration	26
3.5	The Michelson-Morley Experiment	28
3.6	Portable Clocks	29
3.7	Two Misconceptions or Apparent Paradoxes	31
3.8	Acceleration and Time Keeping	33
3.9	The Gravitational Red Shift	37
3.10	The Thomas Precession	38
3.11	Discussion	39
	Problems	40
CHAPTER 4	CLASSICAL DYNAMICS	43
4.1	Mass, Momentum and Force	43
4.2	Work and Energy	43
4.3	Newtonian Forces	44
4.4	Conservation of Energy	46
4.5	Angular Momentum	47
4.6	Summary of Newtonian Results	48
4.7	Composite Bodies	49
4.8	Non-Newtonian Forces	50
4.9	Impressed Forces	52
	Problems	53
CHAPTER 5	RELATIVISTIC DYNAMICS I	55
5.1	Mass and Momentum	55
5.2	Energy and Mass	58

5.3	Force and Work	59
5.4	Summary	62
	Problems	63
CHAPTER 6	RELATIVISTIC DYNAMICS II	65
6.1	Radiation Pressure	65
6.2	The Transformation of Energy	66
6.3	The Limiting Velocity	67
6.4	The Zero Momentum Frame	67
6.5	Centre of Momentum Frame and Collisions .	68
6.6	Elastic Scattering and the Compton Effect	69
6.7	Radiative Recoil	70
6.8	Centre of Mass Motion	72
6.9	Force	76
6.10	Forced Particle Motions	77
6.11	Summary	79
	Problems	80
CHAPTER 7	4-VECTORS	81
7.1	4-Vectors Defined	82
7.2	Some Simple 4-Vectors	83
7.3	Vector Products and Tensors	86
7.4	Partial Derivatives	88
7.5	Symmetric and Antisymmetric Tensors	88
7.6	Infinitesimal Lorentz Transformations ...	89
7.7	Scalar Invariants	90
7.8	Discussion	91
	Problems	92
CHAPTER 8	CLASSICAL ELECTROMAGNETISM	93
	Problems	98
CHAPTER 9	ELECTROMAGNETISM and RELATIVITY	99
9.1	Covariance of the Basic Equations	99
9.2	The Force Equation.	101
9.3	Transformation of the Current Density. .	102
9.4	The Field Transformation.	103
9.5	Field Invariants.	105
9.6	Polarisation and Magnetisation	107
9.7	Fizeau's Drag Coefficient	108
9.8	Radiation by a Charged Particle.	109
9.9	The Thomas Precession	111
9.10	g-2 Experiments and a Test of Special Relativity	112
9.11	Electrostatics, Relativity and Electromagnetism	113

9.12	Discussion	116
	Problems	117
CHAPTER 10	RELATIVISTIC DYNAMICS III	119
10.1	Continuous Media	119
10.2	The Energy-Momentum Tensor	120
10.3	Symmetry of the Complete Energy-Momentum Tensor	122
10.4	Angular Momentum I	123
10.5	Angular Momentum II	127
10.6	Orbital and Spin Angular Momentum	128
10.7	Helicity	131
10.8	Discussion	134
	Problems	136
CHAPTER 11	THE PRINCIPLE OF LEAST ACTION	137
11.1	Lagrange's Equations	141
11.2	The Invariant Action Principle	144
11.3	The Relativistic Free Particle	145
11.4	Relativistic Particle in a Field	145
11.5	The Electromagnetic Field	146
11.6	Particles and Electromagnetic Fields	148
11.7	The Hamiltonian	148
11.8	Conservation Laws	151
11.9	Relativity, Quantum Mechanics and Electron Spin	151
11.10	Discussion	153
	Problems	154
APPENDIX	155
A1	Volume	155
A2	Force and Force Density	156
A3	Density and Flux	156
A4	Volume and 3-Surfaces	157
A5	Invariants of a Second-Rank Tensor	159
A6	The Electromagnetic Energy-Momentum Tensor	160
A7	Retarded Potentials	162
A8	Linearity of the Lorentz Transformation	163
A9	Free Particles and Newton's First Law of Motion	164
A10	Some Physical Constants	166
