

# Contents

<b>Preface</b>	<b>ix</b>
<b>Introduction</b>	<b>xv</b>
<b>1 Classical Theory of Synchrotron Radiation</b>	<b>1</b>
1.1 Electromagnetic Fields of Relativistic Charge . . . . .	1
1.2 The Wave Zone and Covariant Definition of Radiation . . . . .	5
1.3 Angular Distribution of Instantaneous Radiation Power . . . . .	9
1.4 Linearly Polarized SR and Its Angular Distribution . . . . .	16
1.5 Electron Radiation in a Uniform Magnetic Field . . . . .	22
1.6 Spectral-Angular Distribution and Circular Polarization of SR . . . . .	25
1.6.1 General Information . . . . .	25
1.6.2 Fourier-Components of Radiation Fields . . . . .	28
1.6.3 Schott's Formula . . . . .	30
1.6.4 Spectral Composition . . . . .	33
1.6.5 The Helical Undulator . . . . .	35
1.7 SR of the Ultrarelativistic Electron . . . . .	37
1.7.1 Radiation of the Ultrarelativistic Charge as SR . . . . .	37
1.7.2 Angular Distribution and Linear Polarization of Radiation . . . . .	39
1.7.3 Spectral Composition and the Circular Polarization of Radiation . . . . .	40
1.7.4 Schwinger's Approximation . . . . .	46
1.7.5 Limits of Validity of the Classical Theory . . . . .	48
1.8 Coherence Properties of SR . . . . .	50
Bibliography . . . . .	55
<b>2 Spin Properties of Relativistic Particles</b>	<b>59</b>
2.1 Spin Kinematics in the Classical and Quantum Theories . . . . .	59
2.2 Physical Interpretation of the Spin Operators . . . . .	66
2.3 Classical Spin Equations of Motion . . . . .	72
2.4 Quasi-Classical Theory of Spin . . . . .	76
2.5 Spin in the Quantum Theory with the Definite Evenness of Operators . . . . .	80
2.6 Frenkel-Corben Classical Spin Equations . . . . .	89
2.7 Some Exact Solutions of the Spin Equations of Motion . . . . .	94

2.7.1	Magnetic Top . . . . .	95
2.7.2	Electron in a Constant and Uniform Magnetic Field . . . . .	101
2.7.3	Spin-Resonance Solutions . . . . .	104
2.7.4	Classical Interpretation of Spin-Flip Transitions . . . . .	108
2.8	Spin Integrals of Motion and Invariant Description of Spin States in the External Electromagnetic Field . . . . .	111
	Bibliography . . . . .	116
<b>3</b>	<b>Quantum Theory of Synchrotron Radiation</b>	<b>121</b>
3.1	Scalar Particles in a Magnetic Field. Klein-Gordon Equation . . . . .	121
3.2	Electron in a Magnetic Field. Dirac Equation. . . . .	124
3.3	Solution of the Dirac Equation for an Electron with a Definite State of Spin Polarization. . . . .	128
3.3.1	Longitudinally Polarised Electron . . . . .	128
3.3.2	Vector Operator of Transverse Polarization . . . . .	129
3.3.3	Tensor Operator of Transverse Polarization . . . . .	130
3.3.4	Radial Projection of the Spin . . . . .	131
3.4	Matrix Elements of the Dirac Matrices. Some Properties of Laguerre Functions . . . . .	132
3.5	Qualitative Estimations for Manifestation of Quantum Effects in SR .	136
3.6	Quantum Effects in Radiation of a Nonrelativistic Electron . . . . .	139
3.7	Mathematical Features of the Problem of Radiation of Ultrarelativistic Particles . . . . .	141
3.8	Calculation of Angle Integrals . . . . .	142
3.9	Calculation of Integrals over Spectrum. Functions $\mathcal{L}_\mu$ and $\mathcal{D}_\mu$ . . . . .	144
3.10	Radiation of the Electron with the Longitudinally Polarized Spin . .	150
3.11	Radiation of the Electron with a Spin Oriented to the Magnetic Field	160
3.12	Radiation of a Spinless Particle in a Magnetic Field . . . . .	163
3.13	Characteristic Features of Electron Radiation in a Magnetic Field . .	165
3.14	Radiative Self-Polarization of an Electron Spin . . . . .	171
3.15	Radiation of Uncharged Particles with Magnetic and Electric Moments Moving in Uniform Stationary Electromagnetic Fields . . . . .	172
	Bibliography . . . . .	176
<b>4</b>	<b>Spin Light</b>	<b>179</b>
4.1	Introduction . . . . .	179
4.2	Classical Theory of $\mu$ -Radiation . . . . .	181
4.2.1	Equations of an Electromagnetic Field . . . . .	181
4.2.2	Potentials and Fields of a Relativistic Magnetron . . . . .	184
4.2.3	Wave Zone and Radiation Field . . . . .	187
4.2.4	Total Radiation Power in a Uniform Motion of a Magnetron . .	188
4.3	Radiation of the Relativistic Magnetic Moment in Uniform Fields . .	192
4.3.1	Angular Distribution and Frequency of Radiation . . . . .	193

4.3.2	Linear and Circular Polarization of the Radiation . . . . .	198
4.3.3	Ultrarelativistic Case . . . . .	202
4.3.4	Spectral Composition of the Radiation . . . . .	204
4.4	Relativistic Semiclassical Radiation Theory . . . . .	207
4.5	Recoil Effects and Mixed $e\mu$ -Radiation . . . . .	212
4.6	Mixed $e\mu L$ - and $e\mu Th$ -Radiation of Relativistic Electron . . . . .	217
4.7	The Structure of Quantum Corrections to SR . . . . .	221
4.8	'True' Magnetic Moment Radiation . . . . .	226
	Bibliography . . . . .	232
<b>5</b>	<b>Undulator Radiation</b> . . . . .	<b>237</b>
5.1	General Theory . . . . .	237
5.1.1	The Undulator Parameter . . . . .	237
5.1.2	Spectrum and Angular Distribution . . . . .	241
5.1.3	Polarization . . . . .	246
5.1.4	Radiation of an Infinite Undulator . . . . .	250
5.2	Approximate Methods . . . . .	252
5.2.1	Radiation in a Small $k$ Limit . . . . .	252
5.2.2	Radiation in a Large $k$ Limit . . . . .	258
5.2.3	Paraxial Approximation . . . . .	264
5.2.4	Quantum Effects in Wiggler Radiation . . . . .	268
5.3	An Undulator with the Sinusoidal Magnetic Field . . . . .	275
5.3.1	A Double-Frequency Undulator . . . . .	275
5.3.2	An Undulator with the Sinusoidal Magnetic Field . . . . .	280
5.3.3	Radiation in a Small $k$ Limit . . . . .	283
5.3.4	Radiation in a Large $k$ Limit . . . . .	284
5.4	Radiation of a Harmonic Oscillator . . . . .	292
5.4.1	General Theory . . . . .	292
5.4.2	A Transversal Harmonic Oscillator . . . . .	297
5.4.3	A Longitudinal Harmonic Oscillator . . . . .	299
5.4.4	A Helical Undulator . . . . .	302
	Bibliography . . . . .	306
<b>6</b>	<b>Radiation in Special Electrodynamical Systems</b> . . . . .	<b>309</b>
6.1	Introduction . . . . .	309
6.2	Radiation of Electrons Moving in an Arc of a Circle . . . . .	310
6.2.1	General Expressions . . . . .	310
6.2.2	Angular Distribution of Radiation . . . . .	312
6.2.3	Generation of the Low-Frequency Radiation . . . . .	315
6.2.4	High-frequency Asymptotics of Spectrum . . . . .	318
6.2.5	Radiation of a Nonrelativistic Electron . . . . .	319
6.2.6	Radiation in Case of Integral Number of Revolutions . . . . .	320

6.2.7	Representation of Spectrum in Terms of Two-Dimensional Integrals . . . . .	321
6.2.8	Numerical Analysis of Spectrum . . . . .	326
6.3	Radiation in a 'Short Magnet' . . . . .	326
6.4	Inverse Problem of Radiation . . . . .	337
	Bibliography . . . . .	343
<b>7</b>	<b>Synchrotron Radiation in a Strong Magnetic Field</b>	<b>347</b>
7.1	Introduction . . . . .	347
7.2	Quantum Theory of Radiation at Small $\chi$ . . . . .	351
7.2.1	Semiclassical Approximation . . . . .	351
7.2.2	Macroscopic Quantum Fluctuations of an Electron Trajectory . . . . .	353
7.2.3	Self-Polarization of Electrons and Positrons in Storage Rings . . . . .	356
7.2.4	Ultraquantum Aspects of SR ("Magnetic Bremsstrahlung") . . . . .	357
7.2.5	SR of Relativistic Electrons and their Quantum Transitions to the Ground State . . . . .	364
7.3	Dynamical Nature of the Anomalous Magnetic Moment of an Electron . . . . .	374
7.3.1	Weak Field . . . . .	379
7.3.2	Ultrastrong Magnetic Field . . . . .	380
	Bibliography . . . . .	382
<b>8</b>	<b>Synchrotron Radiation in Astrophysics</b>	<b>385</b>
8.1	Introduction . . . . .	385
8.2	SR Spectra of Extraterrestrial Sources . . . . .	386
8.3	Accretion of Magnetized Gas into a Black Hole . . . . .	390
8.3.1	Spherically Symmetric Accretion. . . . .	390
8.3.2	Accretion at an Ordered Magnetic Field . . . . .	394
8.4	SR in Radio-Galactics, Quasars and Extragalactic Jets . . . . .	398
8.4.1	SR Self-absorption and Estimation of a Size of a Source . . . . .	399
8.4.2	SR in Extragalactic Jets; Magnetic Collimation and Particle Acceleration . . . . .	403
8.5	Magnetized Neutron Stars: Radio and X-ray Pulsars . . . . .	411
8.5.1	Radio Pulsars; Coherent SR . . . . .	411
8.5.2	Accretion into Neutron Stars; Strong X-ray Sources . . . . .	416
8.6	SR from Supernovae and Supernova Remnants . . . . .	424
8.6.1	Radio Emission From Supernovae . . . . .	427
8.6.2	Radio Emission of Supernova Remnants . . . . .	433
8.7	Cosmic Rays and SR . . . . .	437
	Bibliography . . . . .	439
	<b>Index</b>	<b>444</b>
