

## CONTENTS

Foreword . . . . .	ix
<i>Guest Editors: J. L. Huertas, W.-K. Chen and R. N. Madan</i>	
Chapter 1 Chua's Circuit and the Qualitative Theory of Dynamical Systems . . . . .	1
<i>C. Mira</i>	
Chapter 2 Nonlinear Science and the Laws of Nature . . . . .	11
<i>I. Prigogine</i>	
Chapter 3 Visions of Synergetics . . . . .	29
<i>H. Haken</i>	
Chapter 4 Mathematical Problems of Nonlinear Dynamics: A Tutorial . . . . .	69
<i>L. Shilnikov</i>	
Chapter 5 Experimental Nonlinear Physics . . . . .	157
<i>W. Lauterborn, T. Kurz and U. Parlitz</i>	
Chapter 6 Nonlinear Physics: Integrability, Chaos and Beyond . . . . .	209
<i>M. Lakshmanan</i>	
Chapter 7 Nonlinear Science: The Impact of Biology . . . . .	283
<i>A. V. Holden</i>	
Chapter 8 Nonlinear Computation . . . . .	333
<i>R. Seydel</i>	
Chapter 9 Nonlinear Numerics . . . . .	373
<i>E. Doedel</i>	
Chapter 10 Some Historical Aspects of Nonlinear Dynamics: Possible Trends for the Future . . . . .	407
<i>C. Mira</i>	

Chapter 11 Control and Applications of Chaos . . . . .	457
<i>C. Grebogi, Y.-C. Lai and S. Hayes</i>	
Chapter 12 Quantum Dot Devices and Quantum-Dot Cellular Automata . . . . .	495
<i>W. Porod</i>	
Chapter 13 CNN: A Paradigm for Complexity . . . . .	529
<i>L. O. Chua</i>	
Index . . . . .	839
