

CONTENTS

Preface	vii
Introduction	1
1. What is a CNN?	5
2. Part I: Standard CNNs	16
2.1. Standard CNNs are uniquely specified by CNN genes	16
2.2. Oscillations and chaos from standard CNNs	19
2.3. Complete stability criteria for standard CNNs	22
2.4. Bistable criterion	27
2.5. Coding the CNN gene	32
2.5.1. Edge detection CNN	33
2.5.2. Corner detection CNN	39
2.6. A gallery of basic CNN genes	43
2.7. Does there exist a CNN gene for solving Minsky's global connectivity problem?	92
2.8. Decoding the CNN gene	109
2.8.1. Examples of input output CNN operators	110
2.8.2. Uncoupled CNN genes	111
2.8.3. Boolean CNN genes and truth tables	116
2.9. What task can an uncoupled Boolean CNN gene Perform?	131
2.10. Bifurcation of CNN genes	136
2.11. The game-of-life CNN gene	143
2.12. The CNN universal machine	155
2.13. Generalized cellular automata	168
2.14. A glimpse at some real-world CNN applications	189
3. Part II: Autonomous CNNs	206
3.1. Pattern formation in standard CNNs	208
3.1.1. Characterization of stable equilibria	208
3.1.2. The dynamics of pattern formation	211
3.1.3. CNN pattern formation in biology and physics	217
3.2. Pattern formation in reaction-diffusion CNNs	226
3.3. Nonlinear waves in reaction-diffusion CNNs	235
3.4. Simulating nonlinear PDEs via autonomous CNNs	253

- 4. Part III: Local Activity: The Genesis of Complexity 266
 - 4.1. Transistors and local activity: What do they have in common? 267
 - 4.2. Nonlinear circuit models for reaction-diffusion CNNs 268
 - 4.3. What is local activity? 276
 - 4.3.1. Cell equilibrium points 278
 - 4.3.2. Local state equations and local power flows 281
 - 4.3.3. Local activity in reaction-diffusion CNN cells 286
 - 4.4. Testing for local activity 288
 - 4.4.1. Testing one-port CNN cells for local activity 288
 - 4.4.2. Testing two-port CNN cells for local activity 293
 - 4.5. Why is local activity necessary for pattern formation? 298
 - 4.6. How to choose locally-active CNN parameters? 300
 - 4.7. Local activity and stability are different concepts 300
 - 4.8. The local activity dogma 302
- Index 311
