

# Contents

<b>Reader Guidelines</b>	<b>1</b>
<b>1 Preliminaries</b>	<b>5</b>
1.1 Basic Concepts from Probability Theory . . . . .	6
1.1.1 Random Variables . . . . .	6
1.1.2 Random Vectors . . . . .	14
1.1.3 Independence and Dependence . . . . .	19
1.2 Stochastic Processes . . . . .	23
1.3 Brownian Motion . . . . .	33
1.3.1 Defining Properties . . . . .	33
1.3.2 Processes Derived from Brownian Motion . . . . .	40
1.3.3 Simulation of Brownian Sample Paths . . . . .	44
1.4 Conditional Expectation . . . . .	56
1.4.1 Conditional Expectation under Discrete Condition . . . . .	56
1.4.2 About $\sigma$ -Fields . . . . .	62
1.4.3 The General Conditional Expectation . . . . .	67
1.4.4 Rules for the Calculation of Conditional Expectations . . . . .	70
1.4.5 The Projection Property of Conditional Expectations . . . . .	74
1.5 Martingales . . . . .	77
1.5.1 Defining Properties . . . . .	77
1.5.2 Examples . . . . .	81
1.5.3 The Interpretation of a Martingale as a Fair Game . . . . .	84
<b>2 The Stochastic Integral</b>	<b>87</b>
2.1 The Riemann and Riemann–Stieltjes Integrals . . . . .	88
2.1.1 The Ordinary Riemann Integral . . . . .	88
2.1.2 The Riemann–Stieltjes Integral . . . . .	92
2.2 The Itô Integral . . . . .	96
2.2.1 A Motivating Example . . . . .	96

2.2.2	The Itô Stochastic Integral for Simple Processes . . . . .	101
2.2.3	The General Itô Stochastic Integral . . . . .	107
2.3	The Itô Lemma . . . . .	112
2.3.1	The Classical Chain Rule of Differentiation . . . . .	113
2.3.2	A Simple Version of the Itô Lemma . . . . .	114
2.3.3	Extended Versions of the Itô Lemma . . . . .	117
2.4	The Stratonovich and Other Integrals . . . . .	123
<b>3</b>	<b>Stochastic Differential Equations</b>	<b>131</b>
3.1	Deterministic Differential Equations . . . . .	132
3.2	Itô Stochastic Differential Equations . . . . .	134
3.2.1	What is a Stochastic Differential Equation? . . . . .	134
3.2.2	Solving Itô Stochastic Differential Equations by the Itô Lemma . . . . .	138
3.2.3	Solving Itô Differential Equations via Stratonovich Cal- culus . . . . .	145
3.3	The General Linear Differential Equation . . . . .	150
3.3.1	Linear Equations with Additive Noise . . . . .	150
3.3.2	Homogeneous Equations with Multiplicative Noise . . . . .	153
3.3.3	The General Case . . . . .	155
3.3.4	The Expectation and Variance Functions of the Solution . . . . .	156
3.4	Numerical Solution . . . . .	157
3.4.1	The Euler Approximation . . . . .	158
3.4.2	The Milstein Approximation . . . . .	162
<b>4</b>	<b>Applications of Stochastic Calculus in Finance</b>	<b>167</b>
4.1	The Black–Scholes Option Pricing Formula . . . . .	168
4.1.1	A Short Excursion into Finance . . . . .	168
4.1.2	What is an Option? . . . . .	170
4.1.3	A Mathematical Formulation of the Option Pricing Pro- blem . . . . .	172
4.1.4	The Black and Scholes Formula . . . . .	174
4.2	A Useful Technique: Change of Measure . . . . .	176
4.2.1	What is a Change of the Underlying Measure? . . . . .	176
4.2.2	An Interpretation of the Black–Scholes Formula by Chan- ge of Measure . . . . .	180
<b>Appendix</b>		<b>185</b>
A1	Modes of Convergence . . . . .	185
A2	Inequalities . . . . .	187

A3	Non-Differentiability and Unbounded Variation of Brownian Sample Paths . . . . .	188
A4	Proof of the Existence of the General Itô Stochastic Integral . .	190
A5	The Radon–Nikodym Theorem . . . . .	193
A6	Proof of the Existence and Uniqueness of the Conditional Expectation . . . . .	194
	<b>Bibliography</b>	<b>195</b>
	<b>Index</b>	<b>199</b>
	<b>List of Abbreviations and Symbols</b>	<b>209</b>
