Contributors' Biographies	vii
Preface	ix
Introduction	1
Newton's Scholarship in Historical Perspective <i>I. Bernard Cohen</i>	11
Newton's Experimental Investigation of Diffraction for the <i>Opticks</i> : A Preliminary Study <i>Alan E. Shapiro</i>	29
Comparison of Newton's Diffraction Measurements With the Theory of Fresnel <i>Michael Nauenberg</i>	59
Newton's Dynamics: The Diagram as a Diagnostic Device <i>J. Bruce Brackenridge</i>	71
Fluid Resistance: Why Did Newton Change His Mind? <i>George E. Smith</i>	105
Addendum to G. Smith's "Fluid Resistance: Why did Newton Change his Mind?" <i>Michael Nauenberg</i>	137
Newton's Mathematical Language <i>John Fauvel</i>	145
Newton's Expansion for the Square Root of an Algebraic Equation by an Equivalent Arithmetic Method <i>Michael Nauenberg</i>	161

Newton's Portsmouth Perturbation Method and its Application to Lunar Motion <i>Michael Nauenberg</i>	167
Review and Reminiscences <i>A. Rupert Hall</i>	197
How Does One Come to Edit Newton's Mathematics? <i>Derek Thomas Whiteside</i>	209
From Kepler to Newton: Telling the Tale <i>Curtis Wilson</i>	223
