Volume 1

Foreword by Robert Boyer	v
Preface – A Life of Rewards	vii
On Commutative Prime Power Subgroups of the Norm	1
L. Wos <i>Illinois J. Mathematics</i> 2, no. 2 (1958) 271–284	
The Unit Preference Strategy in Theorem Proving	17
L. Wos, D. Carson, and G. Robinson <i>AFIPS Proc.</i> 26, 1964, pp. 615–621	
Efficiency and Completeness of the Set of Support Strategy in Theorem Proving	29
L. Wos, G. Robinson, and D. Carson <i>J. ACM</i> 12, no. 4 (1965) 536–541	
Automatic Generation of Proofs in the Language of Mathematics	37
L. Wos, G. Robinson, and D. Carson <i>Proc. IFIP Congress</i> 65, 2 (1965) 325–326	
The Concept of Demodulation in Theorem Proving	40
L. Wos, G. Robinson, D. Carson, and L. Shalla <i>J. ACM</i> 14, no. 4 (1967) 698–709	
Paramodulation and Set of Support	54
L. Wos and G. Robinson <i>Lecture Notes in Mathematics</i> , 1968, pp. 276–310	
Axiom Systems in Automatic Theorem Proving	72
G. Robinson and L. Wos <i>Lecture Notes in Mathematics</i> , 1968, pp. 215–236	
Paramodulation and Theorem-Proving in First-Order Theories with Equality	83
G. Robinson and L. Wos <i>Machine Intelligence</i> IV (1969) 135–150	
Maximal Model Theorem	100
L. Wos and G. Robinson <i>J. Symbolic Logic</i> 34 (1969) 159–160	

Completeness of Paramodulation	102
G. Robinson and L. Wos	
<i>J. Symbolic Logic</i> 34 (1969) 160	
Maximal Models and Refutation Completeness: Semidecision Procedures in Automatic Theorem Proving	104
L. Wos and G. Robinson	
<i>Word Problems: Decision Problems and the Burnside Problem in Group Theory</i> , 1973, pp. 609–639	
A Theorem-Proving Language for Experimentation	129
L. Henschen, R. Overbeek, and L. Wos	
<i>Comm. ACM</i> 17, no. 6 (1974) 308–314	
Unit Refutations and Horn Sets	143
L. Henschen and L. Wos	
<i>J. ACM</i> 21, no. 4 (1974) 590–605	
Problems and Experiments for and with Automated Theorem-Proving Programs	166
J. McCharen, R. Overbeek, and L. Wos	
<i>IEEE Trans. on Computers</i> C-25, no. 8 (1976) 773–782	
Complexity and Related Enhancements for Automated Theorem-Proving Programs	197
R. Overbeek, J. McCharen, and L. Wos	
<i>Computers and Math. with Apps.</i> 2 (1976) 1–16	
An Unnatural Attack on the Structure Problem for the Free Jordan Ring on 3 Letters: An Application of Quad Arithmetic	220
B. Smith and L. Wos	
<i>Computers in Nonassociative Rings and Algebras</i> , 1977, pp. 41–138	
Automated Generation of Models and Counterexamples and Its Application to Open Questions in Ternary Boolean Algebra	286
S. Winker and L. Wos	
<i>Proc. 8th Int. Symposium on Multiple-Valued Logic</i> , 1978, pp. 251–256	
Hyperparamodulation: A Refinement of Paramodulation	298
L. Wos, R. Overbeek, and L. Henschen	
<i>Lecture Notes in Computer Science</i> , 1980, pp. 208–219	

Semigroups, Antiautomorphisms, and Involutions: A Computer Solution to an Open Problem, I	315
S. Winker, L. Wos, and E. Lusk	
<i>Math. of Computation</i> 37, no. 156 (1981) 533-545	
Solving Open Questions in Mathematics with an Automated Theorem-Proving Program	330
L. Wos	
<i>Abstracts of the AMS</i> 2, no. 3 (1981) 336	
An Automated Reasoning System	331
L. Wos, S. Winker, and E. Lusk	
<i>Proc. AFIPS National Computer Conference</i> , 1981, pp. 697-702	
Solving Open Questions with an Automated Theorem-Proving Program	343
L. Wos	
<i>Lecture Notes in Computer Science</i> 138 (1982) 1-31	
Procedure Implementation through Demodulation and Related Tricks	376
S. Winker and L. Wos	
<i>Lecture Notes in Computer Science</i> 138 (1982) 109-131	
Automated Theorem Proving 1965-1970	400
L. Wos and L. Henschen	
<i>Classical Papers on Computational Logic</i> 2 (1983) 1-24	
Questions Concerning Possible Shortest Single Axioms for the Equivalent Calculus: An Application of Automated Theorem Proving to Infinite Domains	419
L. Wos, S. Winker, R. Veroff, B. Smith, and L. Henschen	
<i>Notre Dame J. Formal Logic</i> 24, no. 2 (1983) 205-223	
Automated Reasoning: Real Uses and Potential Uses	442
L. Wos	
<i>Proc. 8th IJCAI</i> 2 (1983) 867-876	
A New Use of an Automated Reasoning Assistant: Open Questions in Equivalential Calculus and the Study of Infinite Domains	463
L. Wos, S. Winker, R. Veroff, B. Smith, and L. Henschen	
<i>J. Artificial Intelligence</i> 22 (1984) 303-356	
Open Questions Solved with the Assistance of AURA	517
L. Wos and S. Winker	
<i>Automated Theorem Proving: After 25 Years</i> , 1984, pp. 73-88	

The Linked Inference Principle, II: The User's Viewpoint	532
L. Wos, R. Veroff, B. Smith, and W. McCune	
<i>Lecture Notes in Computer Science</i> 170 (1984) 316–332	
Achievements in Automated Reasoning	549
L. Wos	
<i>SIAM News</i> 14, no. 4 (July 1984) 4–5	
Automated Reasoning Programs: How They Work	560
L. Wos	
<i>SIAM News</i> 14, no. 4 (September 1984) 4–5	
Automated Reasoning	571
L. Wos	
<i>American Mathematical Monthly</i> 92, no. 2 (1985) 85–92	
What Is Automated Reasoning?	583
L. Wos	
<i>J. Automated Reasoning</i> 1, no. 1 (1985) 6–9	
Automating Reasoning	589
L. Wos	
<i>Abacus</i> 2, no. 3 (1985) 6–21	
Job-Shop Scheduling Using Automated Reasoning: A Case Study of the Car-Sequencing Problem	617
B. Parrello, W. Kabat, and L. Wos	
<i>J. Automated Reasoning</i> 2, no. 1 (1986) 1–42	
Negative Paramodulation	661
L. Wos and W. McCune	
<i>Lecture Notes in Computer Science</i> , 1986, pp. 229–239	
Set Theory in First-Order Logic: Clauses for Gödel's Axioms	677
R. Boyer, E. Lusk, W. McCune, R. Overbeek, M. Stickel, and L. Wos	
<i>J. Automated Reasoning</i> 2, no. 3 (1986) 287–327	
A Case Study in Automated Theorem Proving: Finding Sages in Combinatory Logic	729
W. McCune and L. Wos	
<i>J. Automated Reasoning</i> 3, no. 1 (1987) 91–108	
Challenge Problems Focusing on Equality and Combinatory Logic: Evaluating Automated Theorem-Proving Programs	748
L. Wos and W. McCune	
<i>Lecture Notes in Computer Science</i> 310 (1988) 714–729	

Automated Theorem Proving and Logic Programming: A Natural Symbiosis	766
L. Vos and W. McCune	
<i>J. Logic Programming</i> 11, no. 1 (1991) 1–53	

Volume 2

Subsumption, a Sometimes Undervalued Procedure	829
L. Vos, R. Overbeek, and E. Lusk	
<i>Festschrift for J. A. Robinson</i> , 1991, pp. 3–40	
Applications of Automated Reasoning	871
L. Vos	
<i>Knowledge Engineering</i> 2 (1990) 56–83	
Meeting the Challenge of Fifty Years of Logic	900
L. Vos	
<i>J. Automated Reasoning</i> 6 (1990) 213–232	
The Absence and the Presence of Fixed Point Combinators	921
W. McCune and L. Vos	
<i>Theoretical Computer Science</i> 87 (1991) 221–228	
Resolution, Binary	934
L. Vos and R. Veroff	
<i>Encyclopedia of Artificial Intelligence</i> , 2nd ed., 1992, 1341–1353	
Automated Reasoning Contributes to Mathematics and Logic	962
L. Vos, S. Winker, W. McCune, R. Overbeek, E. Lusk, R. Stevens, and R. Butler	
<i>Lecture Notes in Artificial Intelligence</i> 449 (1990) 485–499	
Automated Reasoning and Bledsoe’s Dream for the Field	979
L. Vos	
<i>Automated Reasoning: Essays in Honor of Woody Bledsoe</i> , 1991, pp. 297–345	
Logical Basis for the Automation of Reasoning: Case Studies	1026
L. Vos and R. Veroff	
<i>Handbook of Logic in Artificial Intelligence and Logic Programming</i> 2 (1994) 1–40	
The Linked Inference Principle, I: The Formal Treatment	1063
R. Veroff and L. Vos	
<i>J. Automated Reasoning</i> 8, no. 2 (1992) 213–274	

The Application of Automated Reasoning to Questions from Mathematics and Logic	1131
L. Wos and W. McCune	
<i>Annals of Mathematics and AI</i> 5 (1992) 321–370	
Automated Reasoning and Enumerative Search with Applications to Mathematics	1182
J. Zhang and L. Wos	
<i>Proc. Int. Conf. for Young Computer Scientists</i> , 1991, pp. 543–545	
Benchmark Problems in Which Equality Plays the Major Role	1187
E. Lusk and L. Wos	
<i>Lecture Notes in Artificial Intelligence</i> 607 (1992) 781–785	
Experiments in Automated Deduction with Condensed Detachment	1193
W. McCune and L. Wos	
<i>Lecture Notes in Artificial Intelligence</i> 607 (1992) 209–223	
Application of Automated Deduction to the Search for Single Axioms for Exponent Groups	1211
W. McCune and L. Wos	
<i>Lecture Notes in Artificial Intelligence</i> 624 (1992) 131–136	
The Impossibility of the Automation of Logical Reasoning	1218
L. Wos	
<i>Lecture Notes in Artificial Intelligence</i> 607 (1992) 1–3	
The Kernel Strategy and Its Use for the Study of Combinatory Logic	1221
L. Wos	
<i>J. Automated Reasoning</i> 10, no. 3 (1993) 287–343	
Automated Reasoning Answers Open Questions	1288
L. Wos	
<i>Notices of the AMS</i> 5, no. 1 (1993) 15–26	
Preface: The Field of Automated Reasoning	1311
L. Wos	
<i>Computers and Math. with Applications</i> 29, no. 2 (1995) xi–xiv	
The Resonance Strategy	1317
L. Wos	
<i>Computers and Math. with Applications</i> 29, no. 2 (1995) 133–178	

Searching for Circles of Pure Proofs 1378
 L. Wos
J. Automated Reasoning 15, no. 3 (1995) 279–315

The Power of Combining Resonance with Heat 1424
 L. Wos
J. Automated Reasoning 17, no. 1 (1996) 23–81

The Hot List Strategy 1482
 L. Wos and Gail W. Pieper
J. Automated Reasoning 22, no. 1 (1999) 1–44

OTTER and the Moufang Identity Problem 1521
 L. Wos
J. Automated Reasoning 17, no. 2 (1996) 215–257

Automating the Search for Elegant Proofs 1571
 L. Wos
J. Automated Reasoning 21, no. 2 (1998) 135–175

Otter: The CAFE-13 Competition Incarnations 1613
 W. McCune and L. Wos
J. Automated Reasoning 18, no. 2 (1997) 211–220

Programs that Offer Fast, Flawless, Logical Reasoning 1625
 L. Wos
CACM 41, no. 6 (1998) 87–102
