Preface	xi
Changes in the second edition	xvi
1 Preliminaries	1
1.1 General notation	1
1.2 Graphs, loops and cycles	5
2 Interval maps	17
2.1 The Sharkovskii Theorem	17
2.2 Maps with the prescribed set of periods	32
2.3 Forcing relation	42
2.4 Patterns for interval maps	44
2.5 Antisymmetry of the forcing relation	51
2.6 P -monotone maps and oriented patterns	59
2.7 Consequences of Theorem 2.6.13	72
2.8 Stability of patterns and periods	79
2.9 Primary patterns	82
2.10 Extensions	85
2.11 Characterization of primary oriented patterns	92
2.12 More about primary oriented patterns	101

3	Circle maps	105
3.1	Liftings and degree of circle maps	105
3.2	Lifted cycles	114
3.3	Cycles and lifted cycles	117
3.4	Periods for maps of degree different from $-1, 0$ and 1 .	120
3.5	Periods for maps of degree 0	123
3.6	Periods for maps of degree -1	126
3.7	Rotation numbers and twist lifted cycles	135
3.8	Estimate of a rotation interval	156
3.9	Periods for maps of degree 1	162
3.10	Maps of degree 1 with the prescribed set of periods . . .	168
3.11	Other results	172
3.12	Appendix: Lifted patterns	175
4	Entropy	185
4.1	Definitions	185
4.2	Entropy for interval maps	196
4.3	Horseshoes	203
4.4	Entropy of cycles	219
4.5	Continuity properties of the entropy	234
4.6	Semiconjugacy to a map of a constant slope	249
4.7	Entropy for circle maps	261
4.8	Proof of Theorem 4.7.3	277
5	Appendix: Graph maps	291
5.1	Combinatorial dynamics	291
5.1.1	Preliminary definitions	291
5.1.2	Star maps	294
5.1.3	Tree maps	306
5.1.4	Graph maps	318

5.2	Topological entropy	321
5.2.1	Entropy of monotone models of graph maps . . .	325
5.2.2	Zero entropy patterns for tree maps	329
5.2.3	A characterization of maps with positive topological entropy in terms of the set of periods . . .	331
5.2.4	Lower bounds of the entropy depending on the set of periods	333
5.3	Periodic points and topological entropy of transitive graph maps	335
5.4	Periods and entropy of transversal graph maps	343
5.4.1	Preliminary definitions	343
5.4.2	Periodic Lefschetz numbers	344
5.4.3	Periods of transversal graph maps	345
5.4.4	Entropy of continuous graph maps	346
6	Appendix: Rotation Theory	349
6.1	General setup	349
6.2	Subshifts of finite type	354
6.3	Interval maps	358
6.4	Other systems	362
	Bibliography	365
	List of symbols	403
	Index	405
