

Contents

1	Introduction	1
1.1	Aim of Object-Oriented Programming	1
1.1.1	Information Hiding	2
1.1.2	Inheritance	2
1.1.3	Polymorphism	3
1.1.4	Templates	3
1.1.5	Standard Template Library	3
1.2	Why C++ ?	4
2	C++ Basics	5
2.1	Introduction	5
2.2	A Simple C++ Program	7
2.3	Basic Data Types	9
2.4	Arithmetic Operations	11
2.5	ASCII Table and Types Conversion	14
2.6	Precedence Table	16
2.7	Pointers and References	18
2.8	Control Statements	21
2.8.1	Introduction	21
2.8.2	The if Statement	22
2.8.3	The for Loop, while Loop, do-while Loop	24
2.8.4	The switch Statement	26
2.9	Arrays	28
2.10	Strings	33
2.11	The sizeof Operator	37
2.12	The new and delete Operators	38
2.13	Arrays of Pointers	42
2.14	Logical AND, Logical OR and Logical NOT	46
2.15	Pass by Value, Pass by Reference	48
2.16	Command-Line Arguments	51
2.17	Bitwise Operations	55
2.18	Shift Operations	57
2.19	Passing a Function to a Function	59
2.20	Recursion	60
2.21	Inline Assembly Language	63

2.22	Time Header File	64
2.23	Random Numbers	66
2.24	Constants and Inline Functions	67
2.25	Jump Statements	69
2.26	The static Keyword	71
2.27	Structures	72
3	String Manipulations	75
3.1	Introduction	75
3.2	Digit Conversion to Character and String	76
3.3	Character in String	77
3.4	Append a Character to a String	78
3.5	Searching for a Character in a Given String	79
3.6	Delete a Character from a String	80
3.7	Replacement of a Character by a Character	81
3.8	Swapping Characters in a String	82
3.9	First n Characters from a String	83
3.10	Substring in String	84
3.11	Assignment and the Function strcpy	85
3.12	Permutations of a Word	86
3.13	String within String	88
3.14	Comparing Strings	90
3.15	Length of a String	92
3.16	Permutations of Characters in a String	93
3.17	Swapping Parts of a String	95
3.18	String Handling using Recursion	96
3.19	Concatenating Strings	98
3.20	Replacing a Substring in a String	100
3.21	Reversing the Characters in a String	102
3.22	Boyer and Moore's Algorithm	104
3.23	Subsets of a Given Set of Strings	107
3.24	Counting Characters and Digits in a Phrase	108
3.25	Counting Characters and Words in a Phrase	109
3.26	Centering Text	111
3.27	The Function getline	112
4	The Class Concept	113
4.1	Introduction	113
4.2	What is a Class ?	115
4.3	Constructors and Destructors	116
4.4	Copy Constructor	119
4.5	Operator Overloading	120
4.6	The Keyword this	121
4.7	Examples	123
4.7.1	Example 1.	123

4.7.2	Example 2.	126
4.7.3	Example 3.	128
4.7.4	Example 4.	130
4.7.5	Example 5.	133
4.8	Friend	135
4.9	Derivation and Inheritance	137
4.10	Virtual Functions	140
5	Function Templates	143
5.1	Introduction	143
5.2	Examples	144
6	Class Templates	151
6.1	Introduction	151
6.2	Examples	152
6.2.1	A Template Vector Class	152
6.2.2	A Template Stack Class	156
6.2.3	A Template Stack Class with Node	158
6.2.4	Two Generic Data Types	162
7	Sorting and Searching	163
7.1	Introduction	163
7.2	Largest Number in an Array	164
7.3	Quicksort and Bubblesort	165
7.4	Shellsort	167
7.5	Using the Function bsearch	171
7.6	Using the Function lsearch	172
7.7	Name Sorting	173
7.8	Name and Number Sorting Using Templates	177
7.9	Student Names and Student Numbers	181
7.10	Search for Names in a List	183
7.11	Names of Employees in a Table	184
7.12	The Divide-and-Conquer Methodology	186
7.13	Sorting Vectors	187
8	Useful Classes	189
8.1	Introduction	189
8.2	String Class	190
8.2.1	Introduction	190
8.2.2	A Simple String Class	191
8.2.3	Advanced String Classes	194
8.2.4	Standard Library and String Class	200
8.3	Vector Class	204
8.3.1	Introduction	204
8.3.2	A Simple Vector Class	205

8.3.3	Construction of an Advanced Vector Class	209
8.3.4	Listing of Vector Class	217
8.4	Matrix Class	225
8.4.1	Introduction	225
8.4.2	Listing of Matrix Class	228
8.5	Linked Lists	237
8.5.1	Introduction	237
8.5.2	Simple Linked Lists	241
8.5.3	Singly Linked Circular List	243
8.5.4	Recursive List	245
8.5.5	Linked List and Templates	248
8.5.6	Linked List and Iterators	250
8.5.7	Intrusive List	258
8.5.8	Generalized Lists	263
8.6	Binary Trees	269
8.6.1	Introduction	269
8.6.2	A Simple Binary Tree	270
8.6.3	Binary Trees and Templates	272
8.7	A Set Class	276
8.8	A Date and Month Class	282
8.8.1	Introduction	282
8.8.2	Listing of Complete Month and Date Classes	296
9	File Manipulations	305
9.1	Introduction	305
9.2	C Style File Manipulations	308
9.2.1	Output to File	308
9.2.2	Reading String from File	309
9.2.3	Word Count in File	310
9.2.4	File Searching Program	311
9.2.5	Counting Characters in a File	313
9.2.6	Class and Standard Output	316
9.2.7	The Functions fseek, fread, fwrite	318
9.2.8	The Function fscanf	321
9.3	C++ Style File Manipulation	323
9.3.1	Output to File	323
9.3.2	Reading String from File	324
9.3.3	String Replacement in File	325
9.3.4	Reading and Writing of File	327
9.3.5	Writing File to Another File	331
9.4	Binary File Operations	332
9.5	The Functions seekp and seekg	334
9.6	The Function isatty	335
9.7	The Function getenv	336

10 Applications in Finance	337
10.1 Introduction	337
10.2 Payroll	338
10.3 Loan and Interest	340
10.4 Amortization	343
10.5 Calculating the Loan Period	346
10.6 Periodic Savings	348
10.7 Compound Amount	352
10.8 The Floyd–Warshall Algorithm.	356
10.9 The Dijkstra Algorithm	359
10.10 Linear Programming and Simplex Method	362
11 Applications in Administration	375
11.1 Introduction	375
11.2 Names, Address and Inheritance	376
11.3 Line Editor and Nested Classes	379
11.4 Mergesort Applied to a List	386
11.5 Linked List of Strings	390
11.6 Data Encryption	394
11.7 Vector Class and a Dictionary	397
11.8 Spelling Checker	399
11.9 Huffman Code	403
11.10 Eliza	409
11.11 Counting the Letters in a Phrase	414
11.12 The Farmer, Wolf, Goat and Cabbage Problem	420
11.13 Roman Numbers	427
11.14 Day of the Week	430
11.15 Gregorian Calendar	431
11.16 Records	436
11.17 Finite State Machine	443
11.18 Realtor	446
12 Applications in Statistics	453
12.1 Introduction	453
12.2 Arithmetic, Harmonic and Geometric Mean	454
12.3 Mean Value and the Standard Deviation	458
12.4 Histogram for Series of Numbers	461
12.5 Data Fitting by Least Squares	463
12.6 Curve Fitting	467
12.7 Pseudo-Random Number Generator	473
12.8 Correlation Coefficient	475
12.9 Autocorrelation Function	477
12.10 Random Number Generator and π	480

13 Exception Handling	485
13.1 Introduction	485
13.2 Error States	485
13.3 Exception Handling	486
14 The Standard Template Library	503
14.1 Introduction	503
14.2 The Namespace Concept	505
14.3 The Vector Class	506
14.4 The List Class	510
14.5 The Stack Class	512
14.6 The Queue Class	514
14.7 The Deque Class	516
14.8 The Bit Set Class	518
14.9 The Set Class	520
14.10 The Map Class	522
14.11 The Algorithm Class	525
Bibliography	527
Index	529
