

CONTENTS

Foreword	v
Physico-Chemical Thermodynamics of Material Systems: A Review of Basic Concepts and Results <i>Armando Fernández Guillermet</i>	1
Computational Methods for Mesoscopic, Inhomogeneous Plastic Deformation <i>Nasr M. Ghoniem</i>	75
Fingering in Thin Layer Electrodeposition <i>M. Q. López-Salvans, F. Sagués, J. Claret and J. Casademunt</i>	159
Pattern Formation and Surface Modification Technologies <i>D. Walgraef</i>	197
A Review on the Problem of Measuring Non-Linear Damping and the Obtainment of Intrinsic Damping <i>O. A. Lambri</i>	249
A Review of Growing Interfaces in Quenched Disordered Media <i>L. A. Braunstein, R. C. Buceta, A. Días-Sánchez and N. Giovambattista</i>	281
Path Integral Approach to Nearest Neighbor Particle Distance <i>A. D. Sánchez, H. S. Wio and M. A. Rodriguez</i>	305
Plastic Instabilities and Dislocation Patterns <i>D. Walgraef</i>	311
One-Dimensional Recrystallization <i>C. H. Wörner</i>	327
