
Contents

VOLUME I

Research Themes	1
Luncheon Talk and Nomination for Stephen Smale (R. Bott)	8
Some Recollections of the Early Work of Steve Smale (M. M. Peixoto)	14
Luncheon Talk (R. Thom)	17
Banquet Address at the Smalefest (E. C. Zeeman)	20
Some Retrospective Remarks	22
Part I. Topology	
The Work of Stephen Smale in Differential Topology (M. Hirsch)	29
A Note on Open Maps	53
A Vietoris Mapping Theorem for Homotopy	56
Regular Curves on Riemannian Manifolds	63
On the Immersion of Manifolds in Euclidean Space (with R. K. Lashof)	84
Self-Intersections of Immersed Manifolds (with R. K. Lashof)	106
A Classification of Immersions of the Two-Sphere	121
The Classification of Immersions of Spheres in Euclidean Spaces	131
Diffeomorphisms of the 2-Sphere	149
On Involutions of the 3-Sphere (with M. Hirsch)	155
The Generalized Poincaré Conjecture in Higher Dimensions	163
On Gradient Dynamical Systems	166
Generalized Poincaré's Conjecture in Dimensions Greater Than Four	174
Differentiable and Combinatorial Structures on Manifolds	190
On the Structure of 5-Manifolds	195
On the Structure of Manifolds	204

A Survey of Some Recent Developments in Differential Topology	217
The Story of the Higher Dimensional Poincaré Conjecture (What actually happened on the beaches of Rio)	232

Part II. Economics

Stephen Smale and the Economic Theory of General Equilibrium (G. Debreu)	243
Global Analysis and Economics, I: Pareto optimum and a generalization of Morse theory	259
Global Analysis and Economics, IIA: Extension of a theorem of Debreu	271
Global Analysis and Economics, III: Pareto optima and price equilibria	285
Global Analysis and Economics, IV: Finiteness and stability of equilibria with general consumption sets and production	296
Global Analysis and Economics, V: Pareto theory with constraints	305
Dynamics in general equilibrium theory	314
Global Analysis and Economics, VI: Geometric analysis of Pareto Optima and price equilibria under classical hypotheses	321
A Convergent Process of Price Adjustment and Global Newton Methods	335
Exchange Processes with Price Adjustment	349
Some Dynamical Questions in Mathematical Economics	365
An Approach to the Analysis of Dynamic Processes in Economic Systems	368
On Comparative Statics and Bifurcation in Economic Equilibrium Theory	373
The Prisoner's Dilemma and Dynamical Systems Associated to Non-Cooperative Games	380
Global Analysis and Economics	398
Gerard Debreu Wins the Nobel Prize	438
Global Analysis in Economic Theory	440

Part III. Miscellaneous

Scientists and the Arms Race	445
On the Steps of Moscow University	454
Some Autobiographical Notes	461
Mathematical Problems for the Next Century	480

VOLUME II**Part IV. Calculus of Variations (Global Analysis) and PDE's**

Smale and Nonlinear Analysis: A personal perspective (A. J. Tromba)	491
A Generalized Morse Theory (with R. Palais)	503
Morse Theory and a Non-Linear Generalization of the Dirichlet Problem	511
On the Calculus of Variations	526
An Infinite Dimensional Version of Sard's Theorem	529
On the Morse Index Theorem	535
A correction to "On the Morse Index Theorem"	542
What is Global Analysis?	544
Book Review on "Global Variational Analysis: Weierstrass Integrals on a Riemannian Manifold" by Marston Morse	550
Smooth Solutions of the Heat and Wave Equations	561

Part V. Dynamics

On the Contribution of Smale to Dynamical Systems (J. Palis)	575
Discussion (S. Newhouse, R. F. Williams and others)	589
Morse Inequalities for a Dynamical System	596
On Dynamical Systems	603
Dynamical Systems and the Topological Conjugacy Problem for Diffeomorphisms	607
Stable Manifolds for Differential Equations and Diffeomorphisms	614

A Structurally Stable Differentiable Homeomorphism with an Infinite Number of Periodic Points	634
Diffeomorphisms with Many Periodic Points	636
Structurally Stable Systems Are Not Dense	654
Dynamical Systems on n -Dimensional Manifolds	660
Differentiable Dynamical Systems	664
Nongenericity of Ω -Stability (with R. Abraham)	735
Structural Stability Theorems (with J. Palis)	739
Notes on Differential Dynamical Systems	748
The Ω -Stability Theorem	759
Stability and Genericity in Dynamical Systems	768
Beyond Hyperbolicity (with M. Shub)	776
Stability and Isotopy in Discrete Dynamical Systems	781
Differential Equations	785
Dynamical Systems and Turbulence	791
Review of "Catastrophe Theory: Selected Papers, 1972–1977" by E. C. Zeeman	814
On the Problem of Reviving the Ergodic Hypothesis of Boltzmann and Birkhoff	823
On How I Got Started in Dynamical Systems	831
Dynamics Retrospective: Great problems, attempts that failed	836
What is Chaos?	843
Finding a Horseshoe on the Beaches of Rio	859
The Work of Curtis T. McMullen	865
 Part VI. Mechanics	
Steve Smale and Geometric Mechanics (J. E. Marsden)	871
Topology and Mechanics, I.	889

Topology and Mechanics, II.	916
Problems on the Nature of Relative Equilibria in Celestial Mechanics	936
Personal Perspectives on Mathematics and Mechanics	941

Part VII. Biology, Electric Circuits, Mathematical Programming

On the Mathematical Foundations of Electrical Circuit Theory	951
A Mathematical Model of Two Cells via Turing's Equation	969
Optimizing Several Functions	979
Sufficient Conditions for an Optimum	986
The Qualitative Analysis of a Difference Equation of Population Growth (with R. F. Williams)	993
On the Differential Equations of Species in Competition	997
The Problem of the Average Speed of the Simplex Method	1000
On the Average Number of Steps of the Simplex Method of Linear Programming	1010

VOLUME III

Part VIII. Theory of Computation

On the Work of Steve Smale on the Theory of Computation (M. Shub)	1035
The Work of Steve Smale on the Theory of Computation: 1990–1999 (L. Blum and F. Cucker)	1056
On Algorithms for Solving $f(x) = 0$ (with M. Hirsch)	1076
The Fundamental Theorem of Algebra and Complexity Theory	1108
Computational Complexity: On the geometry of polynomials and a theory of cost, Part I (with M. Shub)	1144
On the Efficiency of Algorithms of Analysis	1180
Computational Complexity: On the geometry of polynomials and a theory of cost, Part II (with M. Shub)	1215
On the Existence of Generally Convergent Algorithms (with M. Shub)	1232

Newton's Method Estimates from Data at One Point	1242
On the Topology of Algorithms, I.	1254
Algorithms for Solving Equations	1263
The Newtonian Contribution to Our Understanding of the Computer	1287
On a Theory of Computation and Complexity over the Real Numbers: NP-completeness, recursive functions and universal machines (with L. Blum and M. Shub)	1293
Some Remarks on the Foundations of Numerical Analysis	1339
Theory of Computation	1349
Complexity of Bezout's Theorem I: Geometric aspects (with M. Shub)	1359
Complexity of Bezout's Theorem II: Volumes and probabilities (with M. Shub)	1402
Complexity of Bezout's Theorem III: Condition number and packing (with M. Shub)	1421
Complexity of Bezout's Theorem IV: Probability of success; Extensions (with M. Shub)	1432
Complexity of Bezout's Theorem V: Polynomial time (with M. Shub)	1453
The Gödel Incompleteness Theorem and Decidability over a Ring (with L. Blum)	1477
Separation of Complexity Classes in Koiran's Weak Model (with F. Cucker and M. Shub)	1496
On the Intractability of Hilbert's Nullstellensatz and an Algebraic Version of " $NP \neq P$?" (with M. Shub)	1508
Complexity and Real Computation: A Manifesto (with L. Blum, F. Cucker and M. Shub)	1516
Algebraic Settings for the Problem " $P \neq NP$?" (with L. Blum, F. Cucker and M. Shub)	1540
Complexity Theory and Numerical Analysis	1560
Some Lower Bounds for the Complexity of Continuation Methods (with J.-P. Dedieu)	1589

A Polynomial Time Algorithm for Diophantine Equations in One Variable (with F. Cucker and P. Koiran)	1601
Complexity Estimates Depending on Condition and Round-off Error (with F. Cucker)	1610
