

## CONTENTS

<b>Preface</b>	<b>vii</b>
Convergence of Generalized Singular Integrals to the Unit, Multivariate Case <i>George A. Anastassiou and Sorin G. Gal</i>	1
Two Contemporary Computational Concepts in Numerical Analysis <i>Ioannis K. Argyros</i>	9
Linear Integral Operators with Homogeneous Kernel: Approximation Properties in Modular Spaces. Applications to Mellin-type Convolution Operators and to Some Classes of Fractional Operators <i>Carlo Bardaro and Ilaria Mantellini</i>	45
On the Simultaneous Approximation of Functions and Their Derivatives <i>Theodore Kilgore</i>	69
On the Computation of Minimal Projections: Millennium Report <i>B. L. Chalmers, F. T. Metcalf, and B. Shekhtman</i>	119
Copositive Polynomial Approximation Revisited <i>Ying Kang Hu and Xiang Ming Yu</i>	157
Neuro-Fuzzy Adaptive Control: Structure, Algorithms, and Performance <i>Augustine O. Esogbue</i>	175
Sampling Theory and Function Spaces <i>Hans-Jürgen Schmeisser and Winfried Sickel</i>	205
Computational Issues in Stable Financial Modeling <i>Carlo Marinelli and Svetlozar T. Rachev</i>	285
Performance Measurements: The Stable Paretian Approach <i>G. Götzenberger, S. T. Rachev, and E. Schwarz</i>	329
Evaluating Statistical Functionals by Means of Projections onto Convex Cones in Hilbert Spaces: Part I & II <i>Thomas Rychlik</i>	407

Dynamical Systems and Discrete Methods for Solving Nonlinear Ill-Posed Problems <i>Ruben G. Airapetyan and Alexander G. Ramm</i>	491
Extrapolation: From Calculation of $\pi$ to Finite Element Method of Partial Differential Equations <i>Xiaoping Shen</i>	537
A Survey on Scaling Function Interpolation and Approximation <i>En-Bing Lin</i>	559
List of Contributors	609
