

CONTENTS

Preface	v
1. In Search of the Relationship between Multiple Solutions Characterizing Coupled-Cluster Theories <i>Piotr Piecuch and Karol Kowalski</i>	1
2. Computational Time-Dependent Two-Electron Theory and Long-Time Propagators <i>Charles A. Weatherford</i>	105
3. Self-Consistent Field Theory of Weakly Bonded Systems <i>Ermanno Gianinetti, Ida Vandoni, Antonino Famulari and Mario Raimondi</i>	141
4. Aromatic DNA Base Stacking and H-Bonding <i>Jiří Šponer, Pavel Hobza and Jerzy Leszczynski</i>	171
5. Direct <i>Ab Initio</i> Dynamics Methodology for Modeling Kinetics of Biological Systems <i>Thanh N. Truong and Dilip K. Maity</i>	211
6. Molecular Structure and Vibrational IR Spectra of Fluoro, Chloro and Bromosubstituted Methanes, Silanes and Germanes: An <i>Ab Initio</i> Approach <i>Józef S. Kwiatkowski and Jerzy Leszczynski</i>	243
Index	307
