

# CONTENTS

## Part I

<b>Preface</b>	v
<b>1. Photodissociation and Reaction Dynamics Studies Using Third-Generation Synchrotron Radiation</b>	3
Author G. Suits	
<b>2. Spectroscopy and Dynamics of Molecular Superexcited Molecules</b>	55
Yoshihiko Hatano	
<b>3. Studies of Molecular Photoionization Dynamics Using Ionic Fluorescence</b>	112
Erwin D. Poliakoff	
<b>4. Photoionization Dynamics from Inner-Shell Mass-Spectrometry</b>	154
Adam P. Hitchcock and John J. Neville	
<b>5. Molecular Inner-Shell Spectroscopy: Polarization Dependence and Characterization of Unoccupied States</b>	228
Nubohiro Kosugi	
<b>6. NEXAFS Spectroscopy and Microscopy of Natural and Synthetic Polymers</b>	285
H. Ade and S. Urquhart	
<b>7. Surface Science and Microscopy Investigations Using Infrared Synchrotron Radiation</b>	356
Paul Dumas and Gwyn P. Williams	

<b>8.</b>	<b>Functional Organic Materials Using UPS and NEXAFS</b>	<b>386</b>
	Kazohiko Seki, Hisao Ishii and Yukio Ouchi	
<b>9.</b>	<b>Fundamental Aspects of Synchrotron Radiation Initiated Surface Chemistry</b>	<b>462</b>
	Richard A. Rosenberg and Sean P. Frigo	
<b>10.</b>	<b>Soft X-ray Fluorescence Spectroscopy for Materials Science and Chemical Physics</b>	<b>517</b>
	E. J. Nordgren, S. M. Butorin, L. C. Duda, J. H. Guo and J.-E. Rubensson	
<b>11.</b>	<b>Surface Reactions Studied by Synchrotron Based Photoelectron Spectroscopy</b>	<b>573</b>
	J. Hrbek	
<b>12.</b>	<b>Electronic and Magnetic Materials</b>	<b>605</b>
	F. J. Himpsel	
<b>Index</b>		<b>I-1</b>

## Part II

<b>Preface</b>		<b>v</b>
<b>13.</b>	<b>Soft X-ray Spectroscopy</b>	<b>629</b>
	P. Lagarde and A.-M. Flank	
<b>14.</b>	<b>Surface XAFS Applied to Atomic and Molecular Adsorbates</b>	<b>664</b>
	Toshiaki Ohta	
<b>15.</b>	<b>X-ray Excited Optical Luminescence Spectroscopies</b>	<b>707</b>
	Andrei Rogalev and José Goulon	
<b>16.</b>	<b>X-ray Reflectivity and XAFS of Thin Films</b>	<b>761</b>
	S. M. Heald and D.-T. Jiang	
<b>17.</b>	<b>Chemical Application of Small Angle Scattering</b>	<b>799</b>
	Benjamin S. Hsiao and Benjamin Chu	

<b>18.</b>	<b>Chemical Applications of Inelastic X-ray Scattering</b>	<b>850</b>
	H. Hayashi, Y. Udagawa, J.-M. Gillet, W. A. Caliebe and C. C. Kao	
<b>19.</b>	<b>Recent Advances in Powder Diffraction</b>	<b>909</b>
	John S. Tse	
<b>20.</b>	<b>Chemical Dynamics and Phase Transformation in High Temperature Processes Using Time Resolved and Spatially Resolved X-ray Diffraction</b>	<b>948</b>
	Joe Wong	
<b>21.</b>	<b>Radiation Chemical Effects of X-ray on Liquids</b>	<b>987</b>
	Richard A. Holroyd and Jack M. Preses	
<b>22.</b>	<b>Microanalysis of Materials Using Synchrotron Radiation</b>	<b>1010</b>
	Keith W. Jones and Huen Feng	
<b>23.</b>	<b>Photochemical and Photoetching Processes</b>	<b>1055</b>
	Tsuneo Urisu	
<b>24.</b>	<b>Application of X-ray Absorption Spectroscopy in Tribology</b>	<b>1091</b>
	Marina L. Suominen Fuller, Masoud Kasrai and G. Michael Bancroft	
<b>25.</b>	<b>Multicore Multichannel-Detection (MCMD) X-ray Absorption Fine Structures (XAFS) Studies of Thin Films</b>	<b>1154</b>
	T. K. Sham, S. J. Naftel and I. Coulthard	
<b>26.</b>	<b>Higher Order Multiple Scattering Theory of XAFS</b>	<b>1213</b>
	J. J. Rehr	
<b>Index</b>		<b>I-1</b>
