

CONTENTS

1	Preface	xiii
2	Program of the Gregory Breit Centennial Symposium	1
3	Introductory Remarks about Gregory Breit	5
	<i>Vernon W. Hughes</i>	
	<i>The Legacy of Gregory Breit</i>	
4	Topics from High Precision Test of Quantum Electrodynamics	15
	<i>Toichiro Kinoshita</i>	
	Introduction	15
	Lepton Magnetic Moment Anomaly	15
	Relativistic Two-Body Bound States	20
	Various Determinations of α	28
	Concluding Remarks	29
5	Helium Fine Structure, from Breit Interaction to Precise Laser Spectroscopy	35
	<i>F. Minardi and M. Inguscio</i>	
	Introduction: Helium Atom and the Fine Structure Constant α	35
	Breit's Two-Electron Theory ...	35
	... and Developments	38
	Experiments	39
	The Florence Experiments	42
	Fine Structure Constant Determinations and Perspectives	48

6	The Isotope Shift	53
	<i>E.W. Otten</i>	
	Introduction	53
	The Discovery of the Nuclear Volume Effect in Isotope Shift	54
	Early Theory of Isotope Shift	56
	Survey of First Generation Results	59
	Second Generation of IS Physics	65
	Discussion of IS Systematics	68
	Present Trends in Isotope Shift Measurements	73
7	Gregory Breit and the Fermion-Fermion Interaction.....	79
	<i>G.E. Brown</i>	
	The Breit Interaction	79
	The Nucleon-Nucleon Interaction	83
8	Ultra-Relativistic Nuclei: A New Frontier	87
	<i>L. McLerran</i>	
	Two Fundamental Issues	87
	The Ultra-Relativistic Nucleus	88
	The High Density of Mesons	91
	Experimentally Probing High Density QCD	92
	AA Scattering	92
	Basic Physics We Want to Study	95
9	Supersymmetry in Nuclei	97
	<i>F. Iachello</i>	
	Supersymmetry	97
	Supersymmetry in Nuclei	98
	Supersymmetry in Nuclei Confirmed	103
	Implications to Other Fields	105
	Conclusions	105
10	100 Years of the Quantum – The Glory and the Shame	107
	<i>John Archibald Wheeler</i>	

Banquet Addresses

11 On Gregory Breit117

McAllister Hull

12 Remarks from a Family Member.....123

Ralph Wyckoff, read by Martin Klein

Frontiers of Nuclear Physics

13 Color, Spin and Flavor-Dependent Forces in Quantum Chromodynamics125

R.L. Jaffe

Introduction 125

Basics: Regularities of the Q-Q Interaction 127

Baryons 130

Mesons 133

Back to Basics: Spectroscopic Rules for Q^N 137

Baryons and Dibaryons 138

Colorspin in Quark Matter 141

14 Nuclear Structure with Stable and Radioactive Beams.....145

R.F. Casten

Introduction 145

Nuclear Structure 147

Studies with Stable Beams and Targets 157

The Study of Exotic Nuclei with RNBs 167

Conclusion 178

15 Equation of State of Nuclear Matter181

Claus-Konrad Gelbke

Introduction	181
Measuring Temperatures	182
Observing Radial Expansion	186
Measuring the Space-Time Characteristics	188
Observing the Effects of Pressure	191
Summary and Outlook	195
16 Electric Dipole Tests of Time Reversal Symmetry	199
<i>Norman F. Ramsey</i>	
Introduction	199
Neutron Beam Experiments	201
Trapped Neutron Experiments	202
Atomic and Molecular Electric Dipole Moment Experiments	205
Theoretical Implications	210
17 Laboratory Studies of Astrophysical Nuclear Reactions.....	217
<i>C. Rolfs</i>	
Introduction	217
Nuclear Astrophysical Rates	218
The LUNA-Project	220
Other Rapidly Developing Experimental Techniques	222
Summary	223
18 Relativistic Heavy Ion Collider Physics	227
<i>John W. Harris</i>	
Introduction	227
The Relativistic Heavy Ion Collider Experiments	234
19 Gregory Breit: July 14, 1899- September 11, 1981	251
<i>McAllister Hull</i>	
<i>(Bibliographical Memoirs from the National Academy of Sciences)</i>	
Introduction	251
Personal History	252
Professional History	257
Biographical Memoirs: Selected Bibliography	269

20 Work on the *Super* and the Study of Atmospheric Ignition271

 A Brief Reminiscence by McAllister Hull 271
 Gregory Breit's declassified report. 274

21 Bibliography of Gregory Breit.....281
