

Contents

Preface	vii
Acknowledgements	ix
Chapter 1 Structure and Function	1
Chapter 2 Symptoms and Signs in Renal Medicine	13
Chapter 3 Renal Investigations	21
Chapter 4 Glomerulonephritis	34
Chapter 5 Nephrotic Syndrome	57
Chapter 6 Pathogenesis and Therapy of IgA Nephritis	83
Chapter 7 Lupus Nephritis	98
Chapter 8 Urinary Tract Infection	107
Chapter 9 Sex and the Kidney	136
Chapter 10 Hypertension and the Kidney	142
Chapter 11 Diuretics	155
Chapter 12 Kidney Stones	164
Chapter 13 Diabetes Mellitus and the Kidney	173
Chapter 14 Fluid and Electrolytes	184
Chapter 15 Acid-Base Balance	195
Chapter 16 Clinical Problems on Fluids, Electrolytes and Acid-Base Balance	205
Chapter 17 Renal Tubular Acidosis	220
Chapter 18 Renal Tubular Disorders	232
Chapter 19 Systemic Disease and the Kidney	240
Chapter 20 Pregnancy and the Kidney	255
Chapter 21 Cancer and the Kidney	258
Chapter 22 Inherited Kidney Diseases	260
Chapter 23 Drugs and the Kidney	267
Chapter 24 Acute Renal Failure	276
Chapter 25 Chronic Renal Failure	287

Chapter 26 Dialysis	300
Chapter 27 Renal Transplantation	318
Appendix: Angiotensin II Receptor Antagonist (ATRA) Therapy in IgA Nephritis	339
Index	342
