

Contents

I	Relativistic Quantum Mechanics	1
1	The Poincaré Group	3
1.1	Notation	3
1.2	The Poincaré Group	4
1.3	The Casimir Operators	5
1.4	The Irreducible Representations	6
1.5	Problems	7
2	Spin 0: The Klein-Gordon Equation	8
2.1	The Equation for a Free Particle	8
2.2	Transformation Properties	9
2.3	The Current	10
2.4	Solutions of the K-G Equation	11
2.5	Inner Product	12
2.6	Normalization	14
2.7	Charged Particles	16
2.8	Charge Conjugation	17
2.9	The Klein Paradox	18
2.10	Coulomb Interaction	20
3	The Dirac Equation	25
3.1	Introduction	25
3.2	The Dirac Equation	26
3.3	Free Particle Solutions	33
3.4	Normalization, Orthogonality, Traces	36
3.4.1	Normalization	36
3.4.2	Orthogonality	37
3.4.3	Traces	39

3.4.4	Gamma Gymnastics	42
3.5	Relativistic Invariance	43
3.6	The Discrete Transformations	50
3.6.1	Charge Conjugation	50
3.6.2	Parity	53
3.6.3	Time Reversal	54
3.6.4	Charge Conjugate Spinors	56
3.7	Problems	57
4	Structure of Dirac Particles	59
4.1	Constants of the Motion	64
4.2	Problems	67
5	Dirac Equation: Central Potentials	68
5.1	Separation of Variables	68
5.2	The Hydrogenic Atom	75
5.3	Problems	80
6	The Weyl or Neutrino Equation	83
6.1	Derivation	83
6.2	Solutions	84
6.3	Problems	85
II	Relativistic Quantum Field Theory	86
7	The Neutral Klein-Gordon Field	88
7.1	Introduction	88
7.2	Classical Real Scalar Field	88
7.3	Particle Interpretation	90
7.4	Quantization of the Field	92
7.5	Annihilation and Creation Operators	93
7.6	The Hamiltonian	94
7.7	Normal Ordering	97
7.8	The Energy-Momentum Tensor	99
7.9	The Field Operators	102
7.9.1	Initial Value Problem	104
7.10	Retarded and Advanced Green's Functions	106

7.11	C-number External Scalar Source	108
7.12	The S-Matrix and the S-Operator	111
7.13	Single Particle Matrix Elements	114
7.14	Problems	116
8	The Charged Klein-Gordon Field	117
8.1	Gauge Invariance	117
8.2	Interaction with an External Electromagnetic Field	122
8.3	Perturbation Theory	123
8.4	Problems	124
9	The Dirac Field	125
9.1	The Free Dirac Field	125
9.2	Quantization	127
9.3	Positive Energy	130
9.4	Green's Functions for Dirac Equation	132
9.5	Perturbation of Electromagnetic Interaction	133
9.6	The S-Operator	135
9.7	Scattering of an Electron by an External EM Field	136
9.8	Cross-Section for Coulomb Scattering	137
9.9	Pair Production in an External Field	142
9.10	Vacuum Polarization	148
9.11	Charge Renormalization	154
9.12	Dispersion Relations	156
9.13	Problems	160
10	Asymptotic Fields: LSZ Formulation	161
10.1	The Scalar Field	161
10.2	Reduction of the S-matrix: Scalar Field	164
10.3	Reduction of the S-matrix: Dirac Field	166
10.3.1	Proton-Meson Scattering	170
10.4	Problems	171
11	Perturbation Theory	172
11.1	The U-matrix	172
11.2	Perturbation of VEV of T-Ordered Products	176
11.3	Wick's Theorem	180
11.4	Graphical Representation	183

11.5	The Pion-Nucleon Interaction	186
11.6	Self-Interacting Boson Field	187
11.7	Feynman Rules: External Field Problems	192
11.8	Electron Scattered by External EM Field	194
11.9	Pair Production	195
11.10	Vacuum Polarization	196
11.11	Second Order Scattering	196
11.12	Conclusion	198
11.13	Problems	198
	Index	200
