

# CONTENTS

Foreword	vii
Synopsis	ix
Nomenclature	xi
Introduction	xiii
1 Calcium Carbonate Fouling	1
1.1. The Ryznar Index	1
1.1.1. Origin of Ryznar's Work	1
1.1.2. Emergence of the Ryznar Index	3
1.1.3. Revised Evaluation of the Ryznar Index	7
1.1.4. Experimental Errors	9
1.2. New Data	11
1.2.1. Use in the Field	13
1.2.2. Margin of Error	16
1.3. The Langelier Index	17
1.3.1. Use in the Field	19
1.3.2. Margin of Error	21
1.4. Choice Between Langelier and Ryznar	22
1.5. The Special Case of Recirculating Systems	23
1.5.1. Closed Recirculating Systems	23
1.5.2. Open Recirculating Systems	23
2 Calcium Sulphate Fouling	27
2.1. Calcium Sulphate Saturation Index	27
2.2. Calculating the Weight of Calcium Sulphate	28
2.3. Use in the Field	31
2.4. The Special Case of Recirculating Systems	32
3 Calcium Phosphate Fouling	37
3.1. Calcium Phosphate Saturation Index	37
3.2. Calculating the Weight of Calcium Phosphate	41
3.3. Use in the Field	44
3.4. The Special Case of Recirculating Systems	48

4 Corrosion of Mild Steel	53
4.1. The Ryznar Index	53
4.1.1. Use in the Field	57
4.1.2. The Special Case of the Recirculating Systems	59
4.2. The Langelier Index	60
4.2.1. Use in the Field	62
4.2.2. The Special Case of the Recirculating Systems	64
4.3. Comparison Between Ryznar Index and Langelier Index	65
4.4. Buffer Capacity	65
4.4.1. Description of Buffer Effect	66
4.4.2. Definition of Buffer Capacity	66
4.4.3. Water Analyses and Buffer Capacity	67
4.4.4. Evaluation of Buffer Capacity	70
4.4.5. Buffer Capacity and Corrosion Rate	73
4.4.6. Use in the Field	73
4.4.7. The Special Case of the Recirculating Systems	75
5 Corrosion of Copper	77
5.1. Cold Water Systems	77
5.1.1. The Lucey Index	78
5.1.2. An Alternative Approach	80
5.1.3. Data Required	80
5.1.4. Effect of Concentration	81
5.1.5. Calculating the Index	82
5.1.6. Time Scale	84
5.2. Hot Water Systems	90
5.2.1. Data on Water Chemistry	90
5.2.2. The Role of Residual Chlorine	95
5.2.3. Time Scale	95
References	99
Tables	101
Index	193
Supplement (Reprint of Ref. 8)	197
