Preface	ix
Contributing Authors	xv
1. Flexible-link Manipulators: Modeling, Nonlinear Control and Observer	1
<i>Marco A. Arteaga and Bruno Siciliano</i>	
1.1 Introduction	1
1.2 Modeling	4
1.3 Nonlinear Control	21
1.4 Control with Nonlinear Observer	34
1.5 Simulation Results	54
1.6 Conclusion	67
References	67
2. Energy-Based Control of Flexible Link Robots	71
<i>S. S. Ge</i>	
2.1 Introduction	71
2.2 Dynamics of a Single-link Flexible Robots	73
2.3 Controller Design	75
2.4 Multi-link Flexible Robotics	90
2.5 Conclusion	98
References	102
3. Trajectory Planning and Compliant Control for Two Manipulators to Deform Flexible Materials	105
<i>Omar Al-Jarrah, Yuan F. Zheng and Keon-Young Yi</i>	
3.1 Introduction	105
3.2 Efficient Trajectory Planning Using Optimal Bending Model	109
3.3 Compliant Control	115
3.4 Stability Analysis	119
3.5 Experimental Study	121
3.6 Conclusions	126
References	126

4. Force Control of Flexible Manipulators	129
<i>Fumitoshi Matsuno</i>	
4.1 Introduction	129
4.2 Force Control of A One-Link Flexible Arm	131
4.3 Dynamic Hybrid Position/ Force Control of Constrained n-Link Flexible Manipulators	151
4.4 Robust Cooperative Control of Two One-link Flexible Arms	172
4.5 Conclusion	185
References	186
5. Experimental Study on the Control of Flexible Link Robots	189
<i>David Wang</i>	
5.1 SFL Manipulator	191
5.2 Multi-Link/Multi-Axis Flexible Link (MMFL) Manipulators	214
5.3 Force Control	224
References	225
6. Sensor Output Feedback Control of Flexible Robot Arms	229
<i>Zheng-Hua Luo</i>	
6.1 Introduction	229
6.2 Dynamic Models of One-Link Flexible Robot Arms	231
6.3 Sensor Output Feedback Control	235
6.4 Experimental Results	252
6.5 Conclusions	258
References	259
7. On GA Based Robust Control of Flexible Manipulators	261
<i>Zhi-Quan Xiao and Ling-Li Cui</i>	
7.1 Introduction	261
7.2 Dynamic Model of One –Link Flexible Manipulators	263
7.3 Mixed H_2/H_∞ Robust PID Control	266
7.4 Improved GA Method for Mixed H_2/H_∞ Robust PD Control Design	268
7.5 Mixed Sensitivity H_∞ Control Problem	273
7.6 GA Method for Mixed Sensitivity H_∞ Control Design	276
7.7 Conclusion	280
References	281

8. Analysis of Poles and Zeros for Tapered Link Designs	283
<i>Douglas L. Girvin and Wayne J. Book</i>	
8.1 Introduction	283
8.2 Nonminimum Phase Systems	287
8.3 Transfer Matrix Method	293
8.4 Results	306
8.5 Conclusions	315
References	317
9. Optimum Shape Design of Flexible Manipulators with Tip Loads	319
<i>Jeffery L. Russell and Yanqing Gao</i>	
9.1 Introduction	319
9.2 Euler-Bernolli Equations	323
9.3 Analytical Solution	328
9.4 Optimization Approach	339
9.5 Multiple Tip Load / Multiple Link Designs	349
9.6 Sensitivity Analysis	355
9.7 Conclusion	357
References	359
10. Mechatronic Design of Flexible Manipulators	363
<i>Pixuan Zhou and Zhi-Quan Xiao</i>	
10.1 Introduction	364
10.2 Dynamics of Flexible Manipulators	368
10.3 Case I: Mechatronic Design Based on LQR Formula with IHR Programming	374
10.4 Case II: Mechatronic Design of Flexible Manipulators-Based on H_∞ Controller with IHR Algorithm	393
10.5 Conclusion	408
References	408
11. A Comprehensive Study of Dynamic Behaviors of Flexible Robotic Links: Modeling and Analysis	411
<i>Yanqing Gao and Fei-Yue Wang</i>	
11.1 Introduction	411
11.2 Problem Description and Energy Calculations	413
11.3 Derivation of Equations of Motion	419

11.4 Linearization	421
11.5 Natural Frequencies and Modal Shape Functions	425
11.6 Step Responses and General Solutions	433
11.7 Conclusion	436
References	436
