

CONTENTS

Preface	v
1 On the Dynamics of Nonlinear Systems	1
1.1 Unpredictability and Chaos	1
1.2 Oscillations and Chaos in Engineering Systems	12
1.3 Simple One-Dimensional Maps	24
1.4 Border-Collision Bifurcations	37
1.5 The Sewing Approach	43
1.5.1 Existence of a periodic solution	51
1.5.2 Global bifurcations	54
2 Basic Concepts and Methods	67
2.1 Bifurcation Analysis for the Hénon Map	67
2.2 Division of the Parameter Plane	71
2.3 Further Analysis of the Hénon Map	80
2.4 Piecewise-Smooth Two-Dimensional Maps	92
2.5 Some Remaining Problems	99
3 Relay Control Systems	113
3.1 Bifurcations and Chaos in Relay Systems	113
3.2 Modeling Relay Systems with Hysteresis	118
3.3 Algorithms for Determining Limit Cycles	121
3.4 Local Stability of Periodic Solutions	123
3.4.1 Nonautonomous dynamical systems	124
3.4.2 Autonomous dynamical systems	131
3.5 Application to Relay Systems	132
3.5.1 Relay system with hysteresis	132
3.5.2 Relay system without hysteresis	133
3.6 Model of a DC/DC Converter with Relay Feedback Control	138

3.7	DC Electric Drive with Relay Control	141
3.7.1	Practical realization of relay control systems	141
3.7.2	Model of electric drive with relay control	153
4	Bifurcations and Chaotic Oscillations in Relay Systems	167
4.1	Relay Control Systems with Complex Dynamics	167
4.2	Two-Parameter Analysis of Dynamical Modes	170
4.3	Analysis of the Branching Patterns	178
4.4	Chaotization of Oscillations in Relay Systems	197
4.5	Complex Oscillations in a DC Electric Drive	206
4.5.1	Mathematical model of a relay system with hysteresis and time deadzone	207
4.5.2	Analysis of the complex behavior	210
4.6	On the Concept of Normal Structures	225
5	Chaotic Oscillations in Pulse-Width Modulated Systems	231
5.1	Application of Pulse-Width Modulation in Power Electronics . .	231
5.2	Voltage Converter with Pulse-Width Modulation	239
5.3	Periodic Solutions and Their Local Stability	246
5.4	Transitions to Chaos via Local Bifurcations	251
5.5	Border-Collision Bifurcations and Transitions to Chaos	254
6	Border-Collision Bifurcations on a Two-Dimensional Torus	279
6.1	Model of a Switching Power Converter	279
6.2	Two-Parameter Diagram of Dynamical Modes	288
6.3	Resonance Tongues and Border-Collision Bifurcations	301
7	Border-Collision Bifurcations in a Management System	321
7.1	Structure Produces Behavior	321
7.2	A Cascaded Production-Distribution System	325
7.3	The BEER Model	327
7.4	Transitions to Chaos	330
7.5	Hyperchaotic Phenomena	337
7.6	Border-Collisions and Resonance Phenomena	344
7.7	Conclusions	350
	Index	359
