

Contents

Foreword	v
Preface	vii
Nobuhara Hospital's Publications on the Shoulder Region	ix
Chapter 1 What is the Shoulder	1
References and Bibliography	4
Chapter 2 History of the Shoulder	6
1. Historical Examination	6
2. Modern Surgery of the Shoulder	6
3. Formation of the Japanese Shoulder Association	7
4. Trend of "Surgery of the Shoulder" in the World	7
5. Establishment of the Asian Shoulder Association	8
References and Bibliography	9
Chapter 3 Construction of the Shoulder	10
A. Bones of the Shoulder	10
1. The Clavicle	10
2. The Scapula	11
3. The Humerus	15
4. The Trunk (the Thorax)	16
B. Joints of the Shoulder	17
1. The Sternoclavicular Joint	18
2. The Acromioclavicular Joint	19
3. The Glenohumeral Joint	19
C. Lubrication of the Shoulder (the Bursas of Shoulder Region)	20
D. Muscles of the Shoulder	21
1. Muscles Connecting the Trunk and the Scapula	21
2. Muscles Connecting the Trunk and the Humerus	22
3. Muscles Connecting the Scapular Region and the Humerus	23
E. Spaces of the Shoulder	25

F. Nerves and Blood Vessels of the Shoulder	26
1. The Brachial Plexus	26
2. Nerves Around the Glenohumeral Joint	28
3. Blood Vessels Around the Shoulder	29
References and Bibliography	30
Chapter 4 Mechanism of the Shoulder	31
A. The Shoulder Complex	31
1. The Shoulder Joint	32
2. The Second Joint of the Shoulder	35
3. The Scapulothoracic Joint	41
4. The Acromioclavicular Joint and the Coracoclavicular Mechanism (C-C Mechanism)	44
5. The Sternoclavicular Joint	45
6. The Long Head of the Biceps Tendon	46
References and Bibliography	47
Chapter 5 Biomechanics of the Shoulder	49
A. Terminology in the Shoulder and Arm Positioning	49
B. Types and Phases of Motion	54
C. Brake of the Shoulder	57
D. The Paradoxes by CODMAN	58
E. Representative Motions of the Shoulder	59
F. Function of the Rotator Cuff	60
G. Setting the Scapular Plane N	61
H. General Muscle Force at Elevation and Depression	63
I. Scapulohumeral Rhythm	64
1. Background	64
2. Analysis of the Scapulohumeral Rhythm	65
J. Motion-Recording Methods and Analysis	66
K. Analysis and Findings using Electromyography	67
L. Glenohumeral Rhythm	69
1. Resolution of Shoulder Motion	70
2. Shoulder — The Complex Joint	70
3. Motion Pattern in Elevation and Depression	70
M. Shape of the Glenoid	71
N. Shape of the Humeral Head	72
O. Observation of Motion of the Humeral Head and Glenoid	73

P. Changes in the Contact Area between the Humeral Head and Glenoid, and Tracing of Action Points	75
Q. Author's Observation of the Motion of the Humeral Head and Glenoid	76
R. Motion of the Scapula	78
S. Rotation of the Humerus and Scapula	79
T. Analysis of Ball Roll and Gliding Motion in Glenohumeral Rhythm	81
U. Changes in Position of the Center of the Humeral Head and the Instant Rotation Center of the Humeral Head in Elevation	82
V. Changes in Intraarticular Pressure	85
1. The Methods and Subjects	85
2. Obtained Findings	86
W. Changes in Subacromial Pressure	86
1. The Methods and Subjects	87
2. Results	89
References and Bibliography	90
Chapter 6 Examination of the Shoulder	92
A. Method of Examination of the Shoulder	92
1. Let's Hear First	92
2. Observation and Palpation of Clinical Features	93
3. Examination While Moving	98
4. Characteristics of Pain in Miscellaneous Diseases	102
5. Sites of Block for Diagnosis	103
B. Radiography of the Shoulder	103
1. Method of Radiography and Its Reading	104
2. Precautions for Reading Normal Radiograms	108
C. Arthrography of the Shoulder	117
1. Imaging Procedure	118
2. Cineradioarthrography	119
3. Findings in Various Types of Diseases	119
4. Effects of Reduction of the Intraarticular Pressure, Joint Distension — Its Application as a Therapeutic Method	124
5. Arthrography of the Acromioclavicular Joint	127
D. MRI of the Shoulder	127
1. The Present State of MRI	127
2. MRI at Nobuhara Hospital	128
3. Presentation of Cases	128
4. Functional 3-Dimensional MRI	128

E. Functional Evaluation of the Shoulder	129
1. Measurements and Recording	132
2. Manual Muscle Strength Testing of the Shoulder	138
3. Activities of in Daily Living (ADL)	152
F. Arthroscopy of the Shoulder	153
G. Examination of the Shoulder using Electrical Methods	153
1. Strength-Duration Curve (S-D Curve) and Chronaxy	154
2. Electromyogram (EMG)	155
3. Findings on Electromyogram	156
References and Bibliography	157
Chapter 7 Diseases of the Shoulder	161
A. Periarthritis of the Shoulder	161
1. What is Periarthritis of the Shoulder (50s Shoulder)?	161
2. Historical View	162
3. Arrangement and Classification of Syndromes	164
4. Classification by the Author	165
5. Clinical Examination of Periarthritis of the Shoulder (50s Shoulder)	166
6. Coracoiditis	170
7. Subacromial Bursitis	170
8. Tendinitis of the Rotator Cuff	171
B. Calcifying Tendinitis	172
C. Diseases of the Long Head of the Biceps Tendon	174
1. Bicipital Tenosynovitis	174
2. Rupture and Dislocation of the Long Head of the Biceps Tendon	176
D. Impingement Syndrome	180
1. Impingement-related Factors	181
2. Diagnosis	184
3. Treatment	186
E. Stiff and Contracted Shoulder	187
1. Method of Examination	188
2. Materials and Methods	188
3. Clinical and Radiographic Assessment	189
4. Analysis of Limited ROM	190
5. State of Contracture	191
6. Treatment	192
7. Discussion	196
References and Bibliography	197

F. Injury of the Rotator Cuff	202
1. Findings on Rotator Cuff Tear	202
2. Materials at Nobuhara Hospital	203
3. Symptoms and Diagnosis	204
4. Trauma and Degeneration	208
5. Classification of Rotator Cuff Tear	208
6. Treatment	219
7. Postoperative Treatments	231
8. Prognosis after Rotator Cuff Repair	236
9. Analysis of Bilateral Rotator Cuff Tears	240
G. Rotator Interval Lesion	240
1. Anatomy and Pathophysiology	241
2. Classification and Data from Nobuhara Hospital	243
3. Diagnosis	244
4. Symptoms and Analysis of the Disease State	245
5. Treatment	247
6. Follow-up Survey and Postoperative Outcome	251
H. Loose Shoulder	254
1. Etiology	255
2. Definition and its Changes	260
3. Symptoms and Diagnosis	261
4. Treatment	264
5. Materials at Nobuhara Hospital and Postoperative Results	271
6. Evaluation of Glenoid Osteotomy	274
7. Studies on the Loose Shoulder	277
References and Bibliography	278
I. Fibrositis of the Shoulder	284
1. What is a Stiff Back (Katakori)?	284
2. Fibrositis of the Shoulder	284
3. Various Causes of Fibrositis of the Shoulder	287
4. Symptoms	288
5. Treatment	290
J. Miscellaneous Diseases	293
1. Congenital Dislocation of the Glenohumeral Joint	293
2. Congenital Dysplasia or Hypoplasia of the Glenoid	294
3. Humerus Varus	294
4. SPRENGEL's Deformity	295
5. Hereditary Cleidocranial Dysostosis	295
6. Anomaly of the Coracoclavicular Ligament	296
7. Osteoarthritis of the Glenohumeral Joint	298
8. Traumatic Osteolysis of the Distal End of the Clavicle	299

9. Changes of the Humeral Head	299
10. Osteochondrosis (Osteochondritis) of the Shoulder	299
11. Myositis Ossificans and Heterotopic Bone Formation	299
12. Shoulder Bump (Nikobu) and Supraacromial Bursitis	300
13. Snapping Shoulder	300
14. Entrapment Neuropathy of the Shoulder	301
15. Neurovascular Compression Syndrome	302
16. Shoulder Hand Syndrome	302
17. Neuralgic Amyotrophy	303
18. Neurotrophic Arthropathy of the Shoulder	303
19. Rheumatoid Arthritis of the Shoulder	304
20. Tuberculosis of the Shoulder	307
21. Suppuration of the Shoulder, Various Types of Arthritis	309
22. Others	310
References and Bibliography	312
Chapter 8 Fracture and Dislocation of the Shoulder	318
A. Dislocation of the Shoulder	318
1. Introduction	318
2. Traumatic Dislocation of the Shoulder	319
3. Chronic and Neglected Dislocation of the Shoulder	321
4. Recurrent Dislocation of the Shoulder	322
5. Subluxation of the Shoulder	346
6. Other Types of Dislocation	348
7. Posterior Dislocation and Subluxation of the Shoulder	349
B. Dislocation of the Acromioclavicular Joint	351
1. Classification of the Disease State	351
2. Cases at Nobuhara Hospital	353
3. Symptoms	354
4. Symptoms in Patients Who Underwent Surgery	354
5. Radiographic Findings	355
6. Treatment	355
7. Rotator Cuff Injury Associated with Dislocation of the Acromioclavicular Joint	363
8. Discussion	363
C. Fracture of the Humerus	364
1. Classification of Fracture	364
2. Materials at Nobuhara Hospital	367
3. Treatment	368

D. Dislocation of the Sternoclavicular Joint	381
E. Fracture of the Clavicle	381
1. Cases at Nobuhara Hospital	382
2. Treatment	382
F. Fracture of the Scapula	385
1. Materials at Nobuhara Hospital	385
2. Fracture Sites and Treatment	387
3. Results	390
References and Bibliography	390
Chapter 9 The Shoulder in Sports	401
A. Analysis of Throwing Motion and Injuries	401
1. Throwing Injuries	401
2. Observation of the Throwing Motion and the Phases	402
3. Recording and Analysis of the Throwing Motion	402
4. Analytical Results of the Throwing Motion	408
5. The State-of-the-Art Motion Analysis	427
6. Concept of the Throwing Plane	432
7. Clinical Practice in Pitching Injuries	434
8. Shoulder Injuries in Sports	435
B. Shoulder Diseases Caused by Throwing	438
1. Tendinitis of the Long Head of the Biceps Tendon and SLAP Lesion	438
2. Tendinitis, Tear of the Rotator Cuff and Subacromial Bursitis	439
3. Rotator Interval Lesion	439
4. Posterior Cuffitis and the Infraspinatus Tendon Lesion (the ISP Lesion)	439
5. Unstable Shoulder Arthrosis	442
6. BENNETT Lesion	443
7. Anteroposterior Instability in the Throwing Plane (the APIT Lesion)	445
8. Throwing Disorder Caused by Fatigue	452
9. Unique Bone Injury	453
10. Injury of the Nerves	454
C. Treatment of Throwing Injury	454
1. Therapeutic Plan	455
2. Surgical Treatments Performed at the Nobuhara Hospital	455
3. Valuable Points to Note in Treatment	455
D. Prevention of Sports Disorder	456
1. The Principle	456
2. Preventive Measures	456
3. Management System	456
References and Bibliography	458

Chapter 10 Other Conservative and Operative Management of the Shoulder	461
A. Methods of Injection and Block	461
1. Subacromial Bursa	461
2. Medial Superior Angle of the Scapula	461
3. Suprascapular Nerve	461
B. Methods of Immobilization	462
1. Immobilization with Cloth/Bandage	462
2. Immobilization with Plaster Cast	462
C. Surgical Approach to the Shoulder Joint	464
1. Anterior Approach	464
2. Superior Approach	465
3. Lateral Approach	466
4. Posterior Approach	466
5. Axillary Approach	467
6. Scapular Approach	467
D. Surgical Techniques	467
1. Arthroplasty of Tear of the Rotator Cuff	467
2. Arthroplasty of the Rotator Interval	467
3. Glenoid Osteotomy	467
4. Arthroplasty of the Second Joint of the Shoulder	467
5. Resection of the Superior Angle of the Scapula	467
6. Arthroplasty of Shoulder Dislocation	467
7. Arthroplasty of Dislocation of the Acromioclavicular Joint and Resection of the End of Clavicle	467
8. Osteosynthesis of Fracture of the Clavicle	467
9. Synovectomy of the Shoulder Joint	468
10. Rotation Osteotomy of the Humerus	468
11. Functional Reconstruction by Tendon Transfer	468
12. The Author's Preferred Method for Reconstruction by Tendon Transfer	469
13. Arthrodesis of the Shoulder	471
E. Replacement Arthroplasty of the Shoulder	472
1. History and the Present State	473
2. Types of Artificial Shoulder Joint	473
3. Changes of Total Shoulder	476
4. Clinical Applications of Prosthetic Replacement	479
References and Bibliography	491

Chapter 11 Physical Therapy of the Shoulder	495
A. Basic Techniques	495
1. Massage	495
2. Relaxation	496
B. Therapeutic Exercise	497
1. Exercises, by Patients Themselves	497
2. Manual Methods	499
3. Methods Using Equipment	500
4. Exercise for Enhancement of Muscle Strength	503
C. Physiotherapy	504
References and Bibliography	504
Index	505
