

CONTENTS

Preface	v
Author List	ix
The Relativistic Energy-Consistent <i>ab initio</i> Pseudopotential Approach and Its Application to Lanthanide and Actinide Compounds <i>M. Dolg and X. Cao</i>	1
Recent Developments of Relativistic Model Core Potential Method <i>E. Miyoshi, Y. Sakai, Y. Osanai, and T. Noro</i>	37
Spin-Orbit Multireference Configuration Interaction Method And Applications to Systems Containing Heavy Atoms <i>A. B. Alekseyev, H.-P. Libermann, and R. J. Buenker</i>	65
Spin-Orbit Coupling Methods and Applications to Chemistry <i>D. G. Fedorov, M. W. Schmidt, S. Koseki, and M. S. Gordon</i>	107
Transgressing Theory Boundaries: The Generalized Douglas-Kroll Transformation <i>A. Wolf, M. Reiher, and B. A. Hess</i>	137
Generalized-UHF Theory for Magnetic Properties with Quasi-Relativistic Hamiltonians <i>R. Fukuda, M. Hada, and H. Nakatsuji</i>	191
Recent Progress in Relativistic Electronic Structure Theory <i>T. Yanai, T. Nakajima, Y. Ishikawa, and K. Hirao</i>	221
PORPHET4R: Four-component Relativistic Atomic and Molecular Program Suite <i>O. Matsuoka and Y. Watanabe</i>	247

Relativistic Density Functional Theory: The BDF Program Package	257
<i>W. Liu, F. Wang, and L. Li</i>	
Four-Component Relativistic Coupled Cluster — Method and Applications	283
<i>U. Kaldor, E. Eliav, and A. Landau</i>
