

CONTENTS

Preface	v
Numerical Analysis and Misspecifications in Finance: From Model Risk to Localization Error Estimates for Nonlinear PDEs <i>C. Berthelot, M. Bossy, and D. Talay</i>	1
The Term Structure of Interest Rates as a Random Field: A Stochastic Integration Approach <i>M. De Donno</i>	27
Revisiting the Greeks for European and American Options <i>E. Gobet</i>	53
Excursions in the Martingale Hypothesis <i>P. Guasoni</i>	73
Analysis of Jump Processes and Its Application to Optimal Control <i>Y. Ishikawa</i>	97
Structure on Solutions of Ergodic Type Bellman Equations of First and Second Orders: Some Observations through the Singular Limits <i>H. Kaise and S.-J. Sheu</i>	119
Multivariate Utility Maximization under Transaction Costs <i>K. Kamizono</i>	133
Enlargement of Filtrations and Models for Insider Trading <i>A. Kohatsu-Higa</i>	151
Variational Equality and Portfolio Optimization for Price Processes with Jumps <i>H. Kunita</i>	167
Applications of the Asymptotic Expansion Approach based on Malliavin-Watanabe Calculus in Financial Problems <i>N. Kunitomo and A. Takahashi</i>	195

A New Simulation Method of Diffusion Processes Applied to Finance <i>S. Kusuoka and S. Ninomiya</i>	233
Non Linear Feedback Effects by Hedging Strategies <i>M. E. Mancino and S. Ogawa</i>	255
Risky Fraction Processes and Problems with Transaction Costs <i>H. Nagai</i>	271
Noncausal Cauchy Problem for the Noncausal SDEs <i>S. Ogawa</i>	289
A Benchmark Framework for Risk Management <i>E. Platen</i>	305
On Dufresne's Perpetuity, Translated and Reflected <i>P. Salminen and M. Yor</i>	337
An Analytic Approach to Secure Pseudo-Random Generation <i>H. Sugita</i>	355
Some Problems Related to the Black-Scholes Type Security Markets <i>J. Yong</i>	369
