Foreword	v
Preface to the 2nd Edition	vii
Preface to the 1st Edition	ix
Acknowledgements	xvi
1. The Relevance of Orchid Physiology to the Industry	1
1.1. Introduction	1
1.2. Orchid Cultivation and Industry	2
1.3. How Basic Orchid Physiology Can Help the Industry	5
1.4. Concluding Remarks	8
2. A Brief Introduction to Orchid Morphology and Nomenclature	11
2.1. Introduction	11
2.2. Growth Habit	11
2.3. Orchid Plant Parts	13
<i>Pseudobulbs</i>	13
<i>Flowers</i>	15
<i>Seeds</i>	22
<i>Leaves</i>	22
<i>Roots</i>	23
2.4. Growth Cycle of Orchids Under Greenhouse Conditions	30
2.5. Nomenclature	30
<i>Species</i>	30
<i>Hybrid</i>	33
2.6. Summary	33

3. Photosynthesis	37
3.1. Introduction	37
3.2. Photosynthetic Pathways	37
3.3. What is $\delta^{13}\text{C}$ Value?	41
3.4. Patterns of CO_2 Fixation in Orchids	45
<i>Thin-leaved orchids</i>	45
<i>Thick-leaved orchids</i>	49
3.5. Photosynthetic Characteristics of Non-Foliar Green Organs	52
<i>Aerial roots</i>	54
<i>Stems</i>	61
<i>Pseudobulbs</i>	62
<i>Flowers and fruit capsules</i>	64
<i>Varying $\delta^{13}\text{C}$ values in non-foliar green organs</i>	66
3.6. Factors Affecting Photosynthesis	68
<i>Effects of light</i>	68
<i>Effects of age</i>	69
<i>Effects of water stress</i>	75
<i>Effects of temperature</i>	77
<i>Effects of sink demands</i>	81
<i>Effects of pollutants</i>	82
<i>Effects of virus infection</i>	84
<i>Effects of elevated carbon dioxide</i>	85
3.7. Concluding Remarks	86
3.8. Summary	87
4. Respiration	93
4.1. Introduction	93
4.2. Respiratory Processes	93
4.3. Respiration in Plant Parts	96
<i>Protocorms and Seedlings</i>	96
<i>Leaves</i>	99
<i>Flowers</i>	101
<i>Roots</i>	106
4.4. Respiratory Drift During Flower Development	109
4.5. Photorespiration	118

4.6. Other Oxidases in Relation to Orchid Respiration	120
4.7. Concluding Remarks	122
4.8. Summary	123
5. Mineral Nutrition	129
5.1. Introduction	129
5.2. Mineral Requirements and Tissue Analysis	129
5.3. Fertiliser Application Practices	136
<i>Effects of organic fertilisers on orchid growth</i>	138
<i>Effects of mulching on orchid growth</i>	139
<i>Effects of inorganic fertilisers on orchid growth</i>	143
5.4. Foliar Application and Root Absorption	149
5.5. Ion Uptake	152
<i>Ion uptake by orchid tissues</i>	152
<i>Ion uptake by orchid roots</i>	153
5.6. Concluding Remarks	161
5.7. Summary	161
6. Control of Flowering	168
6.1. Introduction	168
6.2. Differentiation of Flower Bud	168
6.3. Factors Affecting Flower Induction	170
<i>Juvenility in orchids</i>	172
<i>Response to low temperature</i>	172
<i>Photoperiodic response</i>	177
<i>Hormonal control</i>	177
6.4. Seasonality in Flowering	179
6.5. Application of Flower Induction at the Commercial Level	183
6.6. Bud Drop	188
6.7. Controlling Orchid Flower Production	189
6.8. Concluding Remarks	192
6.9. Summary	193

7. Partitioning of Assimilates	198
7.1. Introduction	198
7.2. The Source–Sink Concept of Phloem Translocation	198
<i>Sources and sinks</i>	199
<i>Phloem loading</i>	200
<i>Along the path</i>	201
<i>Phloem unloading</i>	201
7.3. Patterns of Assimilate Movement in Most Higher Plants	202
7.4. Patterns of Assimilate Movement in Tropical Orchids	204
<i>Assimilate partitioning in the sympodial orchids</i>	205
<i>Assimilate partitioning in the monopodial orchids</i>	220
7.5. Import of Assimilates by Mature Orchid Leaves	226
7.6. The Role of Non-Foliar Green Organs in Assimilate Partitioning	228
7.7. Improving the Harvestable Yield of Orchids	228
7.8. Concluding Remarks	239
7.9. Summary	240
8. Flower Senescence and Postharvest Physiology	245
8.1. Introduction	245
8.2. Senescence in Plants	245
8.3. Growth and Development of Orchid Flower and Inflorescence	247
8.4. Flower Senescence in Orchids	254
<i>Post-pollinated phenomena</i>	254
<i>Ethylene and senescence</i>	256
8.5. Postharvest Handling of Cut-Flowers	267
<i>Preharvest conditions</i>	269
<i>Extension of vase-life</i>	270
<i>Formulation of various solutions</i>	271
<i>Bud opening</i>	276
8.6. Storage and Transport	276
<i>Low-temperature storage</i>	277
<i>Hypobaric storage/controlled storage</i>	277

8.7. Concluding Remarks	280
8.8. Summary	280
9. Recent Advances in Orchid Tissue Culture	288
9.1. Introduction	288
9.2. Factors Affecting Orchid Growth <i>in Vitro</i>	289
<i>Sugar</i>	290
<i>Carbon dioxide</i>	292
<i>Ethylene</i>	293
<i>Nitrogen sources</i>	296
<i>Light</i>	297
<i>Other factors</i>	299
9.3. Improving Orchid Cultures	300
<i>Gas-permeable culture system</i>	300
<i>Alternative supporting media</i>	306
<i>Carbon dioxide enrichment</i>	308
<i>Development of a flow system</i>	310
9.4. <i>In-Vitro</i> Flowering	312
9.5. Thin-Section Culture	313
9.6. Synthetic Seeds	314
9.7. Concluding Remarks	315
9.8. Summary	317
Appendix I: Updated Literature (1997 to 2003)	323
Appendix II: "Can we use elevated CO ₂ to increase productivity in the orchid industry?" (from the <i>Malayan Orchid Review</i>)	339
Subject Index	353
Plant Index	365
