Foreword	xiii
Chapter 1 Cell Biology of Photoreceptors and the RPE: A Brief Introduction <i>David S. Williams</i>	1
Chapter 2 Crumbs-Dependent Epithelial Organization in Retinal Morphogenesis and Disease <i>Donald F. Ready and Ulrich Tepass</i>	7
Chapter 3 From the Golgi to the Rod Outer Segment: Formation, Movement, Docking and Fusion of Rhodopsin Transport Carriers <i>Dusanka Deretic</i>	29
Chapter 4 Insights on Retinal Degeneration: Molecular Basis of Polarized Rhodopsin Transport <i>Ching-Hwa Sung and Jen-Zen Chuang</i>	65

Chapter 5	Targeting of Visual Pigments to Rod Outer Segment in Rhodopsin Knockout Mice <i>Guang Shi, Francis A. Concepcion and Jeannie Chen</i>	93
Chapter 6	Photoreceptors and Intraflagellar Transport <i>Sheila A. Baker, Gregory J. Pazour, George B. Witman and Joseph C. Besharse</i>	109
Chapter 7	Myosin III in Photoreceptors: What Does It Do? <i>Andréa Dosé, Jennifer Lin-Jones and Beth Burnside</i>	133
Chapter 8	Light-Dependent Translocation of Signaling Proteins in Vertebrate and Invertebrate Photoreceptors <i>Katherine J. Strissel, Maxim Sokolov and Vadim Y. Arshavsky</i>	163
Chapter 9	Centrins, Potential Regulators of Transducin Translocation in Photoreceptor Cells <i>Andreas Gießl, Philipp Trojan, Alexander Pulvermüller and Uwe Wolfrum</i>	195
Chapter 10	The RP1 Gene and Protein in Photoreceptor Biology <i>Sara Achenbach, Qin Liu and Eric A. Pierce</i>	223
Chapter 11	Molecular Organization of Rod Outer Segments <i>Robert S. Molday</i>	259
Chapter 12	Biochemistry and Cell Biology of the Visual Cycle <i>John C. Saari</i>	301

Chapter 13	Role of Mertk in RPE Phagocytosis and Retinal Disease <i>Douglas Vollrath and Wei Feng</i>	351
Chapter 14	Roles of Integrin Receptors in the Daily Phagocytosis of Photoreceptor Outer Segment Fragments by the RPE <i>Emeline F. Nandrot and Silvia C. Finnemann</i>	371
Chapter 15	Myosin VIIa in the Retina <i>David S. Williams and Daniel Gibbs</i>	397
Index		437
