

# Contents

<i>Preface</i>	vii
1. Introduction	1
1.1 Introduction . . . . .	1
1.2 A few preliminary answers . . . . .	3
1.2.1 The relationship between technology and life . . . . .	3
1.2.2 The relationship between life and the arts . . . . .	5
1.2.3 Liquid crystals and life . . . . .	7
1.3 Overview - the road ahead . . . . .	8
2. Scientific Models	11
2.1 Overview . . . . .	11
2.2 Introduction . . . . .	11
2.3 What is a scientific model? . . . . .	12
2.4 References . . . . .	14
2.5 Exercises . . . . .	14
2.6 Research question . . . . .	16
3. Symmetry	17
3.1 Overview . . . . .	17
3.2 Introduction . . . . .	17
3.3 Representation of a pattern . . . . .	18
3.4 Why is chirality important? . . . . .	22
3.5 Repetition of an object . . . . .	23
3.6 Combined symmetries . . . . .	28
3.7 Observing symmetries . . . . .	29

3.8	References . . . . .	37
3.9	Exercises . . . . .	38
4.	Forces and Fields . . . . .	41
4.1	Force . . . . .	42
4.2	Electric forces and fields . . . . .	44
4.3	The importance of Coulomb's law . . . . .	47
4.4	The parallel plate capacitor . . . . .	48
4.5	The electric dipole . . . . .	49
4.6	The dielectric constant . . . . .	52
4.7	References . . . . .	53
4.8	Exercises . . . . .	53
5.	An Introduction to Light Waves . . . . .	57
5.1	Overview . . . . .	57
5.2	Waves . . . . .	57
5.3	Visible light . . . . .	60
5.4	Polarization and polarizers . . . . .	61
5.5	Interaction of electromagnetic waves with matter . . . . .	64
5.6	References . . . . .	70
5.7	Exercises . . . . .	71
5.8	Research questions . . . . .	73
6.	Atoms and Molecules . . . . .	75
6.1	Overview . . . . .	75
6.2	Atoms . . . . .	75
6.3	Molecules . . . . .	79
6.4	Forces and energy . . . . .	80
6.5	Types of chemical bonds . . . . .	85
6.5.1	Ionic bonds . . . . .	85
6.5.2	Covalent bonds . . . . .	86
6.5.3	Metallic bonds . . . . .	87
6.5.4	Band theory of solids . . . . .	89
6.5.5	van der Waals bonds . . . . .	91
6.5.6	Hydrogen bonds . . . . .	92
6.6	Summary . . . . .	93
6.7	References . . . . .	94
6.8	The periodic table of the elements . . . . .	94

6.9	Exercises . . . . .	96
6.10	Research questions . . . . .	98
7.	Molecules and Matter . . . . .	99
7.1	Overview of molecules and matter . . . . .	99
7.2	Introduction . . . . .	100
7.3	Gases . . . . .	101
7.4	Liquids . . . . .	103
7.5	Solids . . . . .	104
7.6	The common phases of matter . . . . .	107
7.7	A digression on temperature and heat . . . . .	109
7.7.1	Temperature scales . . . . .	110
7.7.2	Internal energy and heat . . . . .	112
7.8	An example - water at atmospheric pressure . . . . .	113
7.9	References . . . . .	116
7.10	Exercises . . . . .	117
7.11	Research questions . . . . .	118
8.	Historical Interlude - A Brief History of Polymers, Liquid Crystals, and Semiconductors . . . . .	121
8.1	Introduction . . . . .	121
8.2	Polymers and plastics . . . . .	122
8.3	Liquid crystals and liquid crystal displays . . . . .	128
8.4	Semiconductors . . . . .	132
8.5	References . . . . .	136
9.	Polymers . . . . .	137
9.1	Overview . . . . .	137
9.2	Introduction . . . . .	137
9.3	What is a polymer? . . . . .	138
9.4	The structure of polymers . . . . .	139
9.5	Types of monomers . . . . .	143
9.6	Structures of polymeric phases . . . . .	146
9.7	Plastics . . . . .	151
9.8	The elasticity of materials . . . . .	152
9.9	Fibers . . . . .	154
9.10	Additives . . . . .	156
9.11	Polymers and recycling . . . . .	157

9.12	References . . . . .	159
9.13	Exercises . . . . .	159
9.14	Research questions . . . . .	161
10.	Liquid Crystals . . . . .	163
10.1	Overview . . . . .	163
10.2	Liquid crystals and ordering . . . . .	163
10.3	The building blocks of liquid crystals . . . . .	165
10.4	Liquid crystalline phases – a more detailed look . . . . .	167
10.4.1	The nematic phase . . . . .	167
10.4.2	The cholesteric or twisted nematic phase . . . . .	169
10.4.3	The smectic phases . . . . .	172
10.5	Polymeric liquid crystals . . . . .	176
10.6	Lyotropic liquid crystals . . . . .	179
10.7	Summary . . . . .	183
10.8	References . . . . .	185
10.9	Exercises . . . . .	186
10.10	Research questions . . . . .	188
11.	Semiconductors . . . . .	189
11.1	Overview . . . . .	189
11.2	Introduction . . . . .	189
11.3	Intrinsic semiconductors . . . . .	190
11.4	Doped semiconductors . . . . .	193
11.5	Technological applications of doped semiconductors . . . . .	196
11.6	References . . . . .	202
11.7	Exercises . . . . .	203
11.8	Research questions . . . . .	207
12.	The Molecules of Life . . . . .	209
12.1	Overview . . . . .	209
12.2	Introduction . . . . .	209
12.3	The length, energy, and time scales of life . . . . .	210
12.4	Non-covalent bonds in biomolecular systems . . . . .	213
12.5	The importance of water . . . . .	216
12.6	Proteins . . . . .	217
12.7	Nucleic acids . . . . .	221
12.8	Lipids . . . . .	226

12.9	Carbohydrates . . . . .	229
12.10	Further reading and references . . . . .	232
12.11	Exercises . . . . .	233
12.12	Research questions . . . . .	234
13.	Digital Devices and Microcomputer Basics . . . . .	237
13.1	Overview . . . . .	237
13.2	Introduction . . . . .	238
13.3	Binary numbers . . . . .	238
13.4	Binary arithmetic . . . . .	240
13.5	Basic logic gates . . . . .	241
13.5.1	The <b>AND</b> gate . . . . .	241
13.5.2	The <b>OR</b> gate . . . . .	242
13.5.3	The <b>NOT</b> gate . . . . .	243
13.5.4	The <b>NOR</b> and <b>NAND</b> gates . . . . .	243
13.6	Memory elements . . . . .	244
13.7	Boolean algebra . . . . .	245
13.8	Memory . . . . .	246
13.9	Routing and transfer of data . . . . .	248
13.10	The basic computer . . . . .	249
13.11	A more detailed look at a computer . . . . .	250
13.12	References . . . . .	251
13.13	Exercises . . . . .	252
13.14	Research questions . . . . .	256
14.	Liquid Crystal Displays . . . . .	259
14.1	Overview . . . . .	259
14.2	Introduction . . . . .	259
14.3	Cholesteric temperature indicators . . . . .	260
14.4	Liquid crystal information displays . . . . .	262
14.5	Liquid crystal displays that utilize light scattering . . . . .	268
14.5.1	Dynamic scattering displays . . . . .	268
14.5.2	Liquid crystal dispersion displays . . . . .	270
14.6	An overview of twisted nematic displays . . . . .	273
14.6.1	Some properties of nematic liquid crystal devices . . . . .	274
14.6.2	Characterizing electro-optics of LCDs . . . . .	275
14.7	The twisted nematic LCD . . . . .	277
14.8	Ferroelectric liquid crystal displays . . . . .	280

14.9	References . . . . .	282
14.10	Exercises . . . . .	282
14.11	Research questions . . . . .	286
15.	Putting It All Together - The Laptop Computer . . . . .	287
15.1	Overview . . . . .	287
15.2	Introduction . . . . .	287
15.3	Laptop computer specifications . . . . .	289
15.4	The parts . . . . .	290
15.5	Exercises . . . . .	297
15.6	Research questions . . . . .	298
16.	Liquid Crystals in the Visual Arts . . . . .	299
16.1	Overview . . . . .	299
16.2	Introduction . . . . .	299
16.3	Colors and color mixing . . . . .	300
16.4	Color – pigments and liquid crystals . . . . .	302
16.4.1	Colors by selective absorption or reflection . . . . .	302
16.4.2	Interference colors . . . . .	304
16.5	Cholesteric liquid crystals as an artistic medium . . . . .	309
16.5.1	Free cholesteric liquid crystals . . . . .	309
16.5.2	Encapsulated liquid crystals . . . . .	310
16.5.3	Liquid crystalline polymers . . . . .	311
16.6	The physics of color production by cholesterics . . . . .	311
16.7	References . . . . .	313
16.8	Exercises . . . . .	314
16.9	Research questions . . . . .	315
17.	Lyotropic Liquid Crystals and Life . . . . .	317
17.1	Overview . . . . .	317
17.2	Introduction . . . . .	317
17.3	Biological structures: advantages and disadvantages . . . . .	318
17.4	Liquid crystal structures and biological molecules . . . . .	319
17.5	Diseases and liquid crystalline phases . . . . .	322
17.5.1	Atherosclerosis . . . . .	323
17.5.2	Gallstones . . . . .	324
17.5.3	Sickle cell anemia . . . . .	326
17.5.4	Multiple sclerosis . . . . .	328

17.5.5 Other diseases involving liquid crystalline phases . . .	329
17.5.6 Cancer and liquid crystalline phases . . . . .	329
17.6 Summary . . . . .	330
17.7 References . . . . .	330
17.8 Exercises . . . . .	330
17.9 Research questions . . . . .	336
Appendix A Review of Mathematics	337
A.1 Overview . . . . .	337
A.2 Relationships, proportionality, equations, and graphs . . .	338
A.2.1 Relationships . . . . .	338
A.2.2 Proportionality . . . . .	338
A.2.3 Equations . . . . .	339
A.2.4 Graphs . . . . .	339
A.3 A wee bit of algebra . . . . .	341
A.4 Exponents and scientific notation . . . . .	343
A.5 Rules for exponents . . . . .	344
A.6 Measurement and units . . . . .	344
A.7 References . . . . .	346
A.8 Exercises . . . . .	347
<i>Index</i>	349
