

Contents

<i>Preface</i>	ix
1. Phases and Phase Transitions	1
1.1 Classification of Phase Transitions	4
1.2 Appearance of a Second Order Phase Transition . . .	7
1.3 Correlations	9
1.4 Conclusion	11
2. The Ising Model	13
2.1 1D Ising model	16
2.2 2D Ising model	17
2.3 3D Ising model	20
2.4 Conclusion	23
3. Mean Field Theory	25
3.1 Landau Mean Field Theory	26
3.2 First Order Phase Transitions in Landau Theory . . .	29
3.3 Landau Theory Supplemented with Fluctuations . . .	30
3.4 Critical Indices	32
3.5 Ginzburg Criterion	32
3.6 Wilson's ϵ -Expansion	33
3.7 Conclusion	36

4.	Scaling	37
4.1	Relations Between Thermodynamic Critical Indices . .	39
4.2	Scaling Relations	41
4.3	Dynamic Scaling	45
4.4	Conclusion	47
5.	The Renormalization Group	49
5.1	Fixed Points of a Map	49
5.2	Basic Idea of the Renormalization Group	51
5.3	RG: 1D Ising Model	53
5.4	RG: 2D Ising Model for the Square Lattice (1)	54
5.5	RG: 2D Ising Model for the Square Lattice (2)	57
5.6	Conclusion	60
6.	Phase Transitions in Quantum Systems	63
6.1	Symmetry of the Wave Function	63
6.2	Exchange Interactions of Fermions	65
6.3	Quantum Statistical Physics	67
6.4	Superfluidity	71
6.5	Bose–Einstein Condensation of Atoms	72
6.6	Superconductivity	73
6.7	High Temperature (High- T_c) Superconductors	78
6.8	Conclusion	80
7.	Universality	81
7.1	Heisenberg Ferromagnet and Related Models	81
7.2	Many-Spin Interactions	85
7.3	Gaussian and Spherical Models	86
7.4	The x - y Model	88
7.5	Vortices	92
7.6	Interactions Between Vortices	93
7.7	Vortices in Superfluids and Superconductors	95
7.8	Conclusion	96

8.	Random and Small World Systems	99
8.1	Percolation	99
8.2	Ising Model with Random Interactions	101
8.3	Spin Glasses	103
8.4	Small World Systems	105
8.5	Evolving Graphs	109
8.6	Phase Transitions in Small World Systems	110
8.7	Conclusion	112
9.	Self-Organized Criticality	113
9.1	Power Law Distributions	115
9.2	Sand Piles	117
9.3	Distribution of Links in Networks	118
9.4	Dynamics of Networks	120
9.5	Mean Field Analysis of Networks	124
9.6	Hubs in Scale-Free Networks	126
9.7	Conclusion	128
	<i>Bibliography</i>	129
	<i>Index</i>	133
